I found an interesting collection of videos by Dr. Erik Meijer on the Haskell. They won't make you a Haskell programmer but it will expose you to many of the fundamental concepts in Haskell. Good watch and Dr. Erik Meijer is a brilliant hippie.

<https://www.youtube.com/watch?v=UIUIFQH4Cvolist=PLTA0Ta9Qyspa5Nayx0VCHj5AHQJqp1clD>

Enjoy.

If thats the case I highly recommend Haskell Programming from First Principles (<http://haskellbook.com>). Starts with the foundation and leads into the nitty gritty. Its about 1300+ pages so you're gettings quality content for your money.
