Thread: [Finding information on IP Address](#)

TrioRio - March 2, 2017, 2:13 pm

I apologize if this post is in wrong place. I am in need of some guidance in regards to finding out information on an IP Address. Looking to find out Owner, Physical Address, Phone Number, etc. Any help provided would be appreciated.

Thank You in advance.

Stuntz1107 - March 2, 2017, 3:59 pm

you can know only his operator adresse i think...

DarkCart - March 2, 2017, 4:03 pm

Well the first thing you'll need to do is go to a website like db-ip and input the IP and see what it gives you. If the IP points to a residential area, then it's all easy from there.

Marketing - March 2, 2017, 4:08 pm

I found a website within a few seconds by doing a Google search

Try visiting leakbase.pw

According to Google & visiting the website you're able to search a lot of databases that have IP address(s) within the database.

It's a 50/50 chance you'll find what you're looking for, not 100% guaranteed this method will work though

TrioRio - March 2, 2017, 10:51 pm

I probably should have given a little more info in my first post. I tried to go the google search route and was only able to find country and city or origin. I also spent time trying to find a solution on TOR, but many I found just were either outdated and no longer worked or gave me no new information. I also tried finding software that might solve my problem but many are \$100 + which I just can't afford right now.

Stenly21 - March 3, 2017, 1:46 am

Hi,

Well, if you have the ip then check out ip tracker (google it), this site will give a lot of info, and with that info you can dig even deeper if you want.

Hope this helps!

Husnain5678 - March 3, 2017, 4:28 pm

Firstly to everybody saying oh do a google search etc. im pretty sure op had done so.

And for you op try doing this if you have kali linux. [https ://www.youtube.com/watch?v=nWnWM3MIPAM](https://www.youtube.com/watch?v=nWnWM3MIPAM) (spaces are after 'https' and 'www.')

From there you could see the isp and ring them up and some how see where this ip is connected to and who runs it etc but im not really sure on the last bit.

TrioRio - March 4, 2017, 5:23 pm

Thank you for all the help so far. I will look into all of the suggestions and if I have anymore questions I will let you all know.
