NOTE: If you are a newbie to VPS, it's little hard to set it up as it's an unmanaged VPS service. To be honest, the OP is doing his best in every possible way. So I support the OP. Cheers Bro...

These are all virtual machines like you would buy a VPS from a different provider. Cracking / Scanning on these machines is not allowed (Only cracking is allowed when using proxies) Scanning is forbidden.

I must say, I'm extremely impressed by this guy's support. He patiently responded to my queries and solved the problems. Being a newbie to VPS, I've struggled a lot and he is trying his best to help me. Great support. I would definitely recommend him. Go for this service.

NOTE: If you are a newbie to VPS, it's little hard to set it up as it's an unmanaged VPS service. To be honest, the OP is doing his best in every possible way. So I support the OP. Cheers Bro...

Worst service in universe, my friend bought this, it took them nearly 24 hours to set up. After set up the IP address of the VPS doesn't even reply to pings, nor accepts SSH connection.

Would not recommend.

Dark.Shadow - June 20, 2018, 3:05 am

Worst service.

Poor Support and No regard for their commitment.

Stay away from this

Hello,

I have not been online the past few weeks because i was hospitalized due to heart problems. All pending orders are now being installed, and tickets are being replied to.

I am very sorry for any inconvenience this might have caused people.
