It's very nice to think you have a way out but it's obvious that you're playing around there's no way you're not the one i'm pming (you know the location and the in game name and my hf name) what confirmation more than that do i need

Also why did you close your thread after scamming lmao
also how come you're accusing me that i' a multi and you have 2 matching members ?;)

Good excuse and why should hf members take the loss if your pc got infected if that's true and i don't see where you get the idea of me being a multi if i use vpn ?

keep trying to find another subject to cover your scamming?

him being a multi doesnt say you have to scam him.

You just scammed because he is a new account with no reps and though no one would believe him.

Valid scam report, hope you get your money back op

Because it sounds like an extremely poor excuse for scamming him.

It's also ironic that you would pull out the trust scan, when you are the one who actually has a matching ip with another user.

Well i hope he returns the money cause we all know he didn't get infected at that exact moment of trading it's only an excuse used by most scammers and it's very obvious it's a lie.
