Thread: [How to plant a keylogger \[Video Tutorial\] \[Noob Friendly\]](#)

Frosty07 - March 3, 2017, 10:23 am

Hello fellow members,

I've prepared a noob friendly YouTube video on how to download, install, plant (hide) a keylogger and make it almost invisible.

Just to inform, I used a basic, simple keylogger for this tutorial.
The main point is how you can plant one.

I hope this will help for the beginners :)

DeathCam - October 18, 2017, 8:00 am

legit video, helped me - just a question: is there a way to send this file to someone, they install it and then u can see what they do. asin the screenshots which are taken are sent to some (your) device automatically and u can watch what 'they' r doing?

Frosty07 - October 18, 2017, 2:32 pm

Yes :)

There is a way but in this case you'd need a more advanced keylogger. Also you'd probably have to bind files in order for everything to go as planned ;)

The one I provided in the video is a basic free keylogger where it requires a bit from you (Manually transferring and running the keylogger from one pc to another).

There are features in the program where you can get logs to email, screenshots etc.

Good luck :)

This video overall shows you how you can hide it. The keylogger I provided was an example.

Unfortunately Kidlogger doesn't have an incognito launcher. Although there are tons of keyloggers on hackfourms that have pretty unique features :)

Check out my channel for new videos. I'll be uploading a rat tutorial soon :)

I'll also be looking for good keyloggers.
