Heya!

So basicly I was playing on my smurf and my team kicked me when it was 14-0 I was topfragging all game but they were 4 premade and dicks :D

Will that game still count as a win for me?

Not exactly but pretty much. Your score at the time you were kicked should be factored in. Some people just play the game to annoy others. My favorite was when another dude and I got a premade of three twelve year olds that swore at the other team and got seven kills between them. That is the danger of solo queing.

There a reason CSGO ranks up there with with LoL. This game has and always will be toxic. Mostly due to there being no overwatch system for voice or text and I think that report button for it is none functioning.
