Thread: [\[API\] Screenshare Tool API \(C++ & JAVA\)](#)

xUnlock2 - March 4, 2017, 6:44 pm

So I was bored today, I decided to make an api which would allow you to do string search in java, it's made in C++ and I use JNI to communicate between java and native, I also made this open source. ?

You can view the instructions on how to use this tool on the github repository.

<https://github.com/Buzznacker/ScreenshareAPI>

Tutorial:

[Video: <https://youtu.be/BdG8IKklFXU>]

Pce ?

SIM-852088 - March 4, 2017, 7:34 pm

Vouch, pretty cool project, although it will have little to no use of like anyone here since they are little filthy cheaters, and are "DEVELOPERS" aka copy pasta masters.

GenericSkid - March 4, 2017, 8:34 pm

Question, are all java UTF8 constants (As seen in javap of a given class file) included in the string search?

xUnlock2 - March 4, 2017, 8:57 pm

(Mar 4, 2017 09:34 PM)Lord Pankake Wrote: [\[CITE\]](#) Question, are all java UTF8 constants (As seen in javap of a given class file) included in the string search?

Technically it should since the String comparison is actually just a memory byte regions comparison.

Of all the hackforums names, you choose 'xUnlock2'

Thats og asf lmao

Holy moly, this code is fucking -wild-. It's like an adventure opening each file, with no clue what to expect from one line to another!

I wouldn't touch this with a ten-foot pole unless I was heavily medicated and with a drink in hand. So that's about a 7/10, good stuff.

It's got all I need, time and settings. Get fucked Badlion. All I have to do is load Minecraft from super USB loader booter thingy into my BIOS then execute from BIOS. They'll never catch me.
