zyklon http

dxfnr - March 13, 2017, 12:11 pm

we are now working with the lite keylogger makesup project
as those gives with the compact on feature as similars of those with the available offers by the
internet

to logs of keystrokes
and the snaps of desktop layer
as sends report with the SMTP or FTP if preferred

more with the details of function should be available with the full release of engine
that those had with the customs on feature as improving chance on users as occupying use with
the authorization as running of the working schemes with the stub deployment;

as having of function to work with the writing of files within the customs of folder directory on users
computer
that those had with the initials on triggers as different indication to complete within the admins side
as:

- 1.receiving message to email (working with the same email as admin to receive logs;
we will not comes to open as we work of chance with the http request to read first file with the
contains of request)
- 2/sms to customs of personal number as having with the extension as reading of those with the
similar function of command authorization
- 3.matching on keyword as pre defined within the setting on stubs preparation

more that the feature should occupy the most on lists as the offers by the different kl service;
as offering the running of tasks with the tweaking and computers performance alteration on
improving the system setting
(that those works of the less on strategics as admin might work with the most on metrics
qualification with the different featute on fuctionals)

also as preparing the little fucntion as noticing customs on records with the identification of
computer as forwarding to 3d part system screening online to returns on extent as capturing those
by the attachment files along as with the sending of logs
(those had with the customs on request as admins decision to follows of message similar as above
conditioning)

we might also to gives with the service as providing the web based admin panel to shorten of above similar tasks on confirming admins request as authorizing commands.

<https://hackforums.net/showthread.php?tid=5525817>

My suggestion, for obvious reasons.

Crowley - March 13, 2017, 12:28 pm

Well since you need a good Keylogger, click on my sig and decide for yourself. ?

dxfnr - March 13, 2017, 12:48 pm

good keylogger should had with the function as similar with the perfect kl or more as available some distros offering stubs renting as they manually compiling ones for buyer to work with the stubs on spreading

our POPEYER Lite KL

has with the feature of (PERSONAL) compiling as similar with the BPK/SCKL

the value of function as compiling stubs as with the offers of engine worth as 1 motorcycle honda beat

:)

I've been into someone's network. He has only a shared printer. Is there any way to install a Keylogger there?

Probably not since he hasn't been online in over a year

bijenu - August 24, 2018, 11:24 am

try agent tesla keylogger it is good especially work fine

try also Adarax keylogger it is good especially work fine

shivam1234564 - September 29, 2018, 12:01 am

you can make your own using python

naxster - November 4, 2018, 12:56 pm

Where can I download Adarax Keylogger? :)

Stellen Sie TT - December 3, 2018, 11:38 pm

Did you checkout the Sentinel Keylogger?
