Thread: [Black Arch Linux](#)

K3B4B - March 5, 2017, 5:13 am

Hey, I saw that Black Arch Linux has got a new update. Does anybody know if Black Arch Linux is good? I was wondering. I WILL NOT install Kali Linux. Thank you.

Levi - March 5, 2017, 6:44 am

If the distribution has the packages you want, sure? Drive it yourself.

ShennagigansDN - March 5, 2017, 6:50 am

Personally I'm not a big "black" linux distro user. I find that any tools I need can easily be installed on any distro so I just stick with lightweight ones and grab up the tools I need and use.

vouch

but blackarch isnt too bad as long as you know how to navigate a linux box

redlightrouter - March 5, 2017, 9:32 am

Download Parrot? I personally like how easy Debian distros are.

jollyjeffrey - March 19, 2017, 5:23 am

Debian Kali, Ubuntu all incredibly awesome and easy to learn understand Operating Systems

All based on the same architecture as well

Last_viking - March 19, 2017, 6:33 am

I daily use blackarch I don't find any problem
Problem which iam facing is package management PACman
Navigation is easy but package management isn't easy that all
