Thread: [Fool ISP to think im watching Youtube?](#)

Davy Jones - March 5, 2017, 9:30 am

My ISP limits internet speed but not for some websites like youtube. Is it possible to mimick and fool my ISP to think i am watching youtube while downloading files and other websites? some kind of tunnel needed.

"how can it make it look like I'm on YouTube while watching porn so my ISP doesn't tell my parents"

It was a joke. My ISP does it as well

Most companies throttle the connection in one way or another

Well, when the packages are being sent, they are being send to one of the youtube's IP. You can't fool that. But you can however, make your ISP think that you are receiving packages from Youtube, while the source is somewhere else. For this I believe you need your custom DNS server, and you gotta tweak it a little bit.

Never thought of this. Could something like tunnelbear work?

Ventricular Tachycardia - March 5, 2017, 9:41 am

Hack youtube, make a proxy server there, use it, profit

Katarina Du Couteau - March 5, 2017, 9:53 am

(Mar 5, 2017 10:44 AM)wy5uejytilyuh Wrote: [\[CITE\]](#) Fact is your ISP probably caches Youtube and Spotify requests and therefore makes loading them faster.

Edit: What I'm saying is if you want to download something that isn't cached then you won't get it loaded faster. A.K.A don't bother wrong wtf ???

It cant cache every video and other sites can cache aswell.

???

NuclearPenguin - March 5, 2017, 10:51 am

This could probably work

if you control your router/gateway, you can alter packets real time

never tried with youtube, so it may be at the cost of download speed, hence defeating the purpose
