Thread: [obby's programming services \[python, botting, social media, etc\]](#)

obby - March 5, 2017, 5:43 pm

I have a long history in botting and I'm opening a service to code botting software for any social media, or really any kind of website where botting may be useful (probably not google (gmail, youtube, etc)) for many reasons.

Previous work: <https://hackforums.net/showthread.php?tid=5559521> is entirely in python, I used to sell a kit of software to work with Twitch (2 years ago) HMU for anymore I don't really want to github any of it.

I've written software for hitbox, stream.me, instagram, twitter, ask.fm, curiouscat, etc. I can pretty much do 90% of it all and I do work fixed rate so HMU for a quote.

All work done with payment up front, usually within 24hrs unless large project or I'm insanely busy. Always done in Python.
