Thread: [Still can't post images...](#)

Tamsin - March 5, 2017, 6:07 pm

I don't know why they closed my thread before I could respond, so I will just make a new one. Adding .gif or .jpeg on the end of the link doesn't work either.

YayHar - March 5, 2017, 6:08 pm

Did you use the suggestions listed in the thread like changing the image from http to https?

Cammy - March 5, 2017, 6:38 pm

Post your image link thank you

Seriously how fucking hard is it to post an image

Charger - March 5, 2017, 7:23 pm

Add HTTPS to it.

Post the link to the image you are trying to post, too.

I would suggest using Imgur.

You can only link images from secure connections. (https://)

It is not rocket science.

It sounds like you're using the album link which is the incorrect way. Make sure you're getting the DIRECT IMAGE LINK. After you upload an image, at the top right will be a dropdown box and it'll say Share Image and there will be a BBCode for you to copy and paste. It'll already have [img] at the start of it.

Okay...to all the people saying it's easy...I DID THAT. I am not new to how forums work. It doesn't show my image.

You're linking the album not the direct image.

is this what autism looks like?

SavageAF - March 6, 2017, 1:03 pm

Use the direct link with https, not the album, Jesus
