Thread: [Web App Exploitation Group](#)

?Criminal - March 6, 2017, 2:51 pm

Prereqs: Intermediate to Advanced only

You will need to be good at SE and web app exploitation because we will do a bit of both and client side attacks. This will mainly be a group aimed at web applications so if you're not interested in that, this group is not for you.

Fill out the application as is and I will PM you the discord invite link.

What can you bring to the table?:

What is your prior experience?:

What programming languages do you know?:

Are you frequently busy, because we need people with there head in the game majority of the time?:

Are you familiar with post exploitation?:

Age?:

What can you bring to the table?: Skills

What is your prior experience?: Self taught in the area, also knowledgeable in computer networking and Linux environments (check my threads or something).

What programming languages do you know?: None really. Basic Python. Still learning but not loads. Programming aint my thing.

Are you frequently busy, because we need people with there head in the game majority of the time?: I am always busy on weekends. During the week I am fine.

Are you familiar with post exploitation?: Kinda

Age?: Above 20.

Disparity - March 8, 2017, 5:37 pm

I'm interested, but not too keen on using discord. Does the group have members yet?

I_who_hack - March 9, 2017, 12:25 pm

What can you bring to the table?:15 years of real world exploit development

What is your prior experience?: 20+ years in the field from pentesting networks/web-apps/reversing and exploit development

What programming languages do you know?: Many

Are you frequently busy, because we need people with there head in the game majority of the time?: Time is minimal for me I am retired at this point.

Are you familiar with post exploitation?: Yeah I am fairly familiar if I say so my self.

Age?: > 50

You should also specify why I should join your group I see no point in joining just to have to train you all on basic shit. I see nothing advance what so ever as of now. Prove me wrong.

Corrupt3d - March 14, 2017, 2:12 pm

What can you bring to the table?: PhP and python html and css

What is your prior experience?: making random fun websites just getting into real scripting for hacking tough

What programming languages do you know?: PhP python

Are you frequently busy, because we need people with their head in the game majority of the time?: i can get 6+ hours a day

Are you familiar with post exploitation?: i have heard of it but never really done anything

Age?:16+
