Hellow

I remember my first post when I learned how to use After Effect

I just finished making this one, took me like 20 minuts

Dunno what how it ended up like this but I like it

(and it's 60fps hnnnng...)

Could be a really nice loading gif

Looking good man, I find it very "peaceful" how it looks like, indeed, loading :)
Very well done, clear flat design, nice smooth colors, I just love it!

Off-topic, what do you think of my signature OP?

I just made this myself because my other signature looked like a 5 year old made it ?

Like other guy said it looks like old windows screen saver but still looks nice.

cASTL - March 10, 2017, 8:32 am

Looks real nice man, actually satisfying! Keep it up!

Looks really trippy tbh, but great job! A well 20 minutes spent!
