Thread: [HIGH QUALITY updates service \[MIX, EU, US\]](#)

kubuntu_ru - March 8, 2017, 4:59 am

Hello, I'm selling mix world and EU mix updates. Your file is uploaded to my loader(Smoke Loader) and each order includes a link for you to watch the bot statistics. The traffic I use is good quality world mix. I have 3 years of experience on Russian forums and have good reviews there. I can give you links to threads where I have good reviews in PM. I can sell up to 5-7k updates per day. 1k=2-3 hours. Execution rate is about 70% or better(for example, success rate of clean Smoke Loader is 95%). I can make updates for .exe or .dll file.

Please understand that the biggest part of traffic from advertisement network and I can't warranty that 100% of bots without any malware. But I installing only 1 file to 1 bot.

Prices for world mix:

1k=100\$

5k=450\$ 1k=90\$

10k=800\$ 1k=80\$

Prices for EU mix:

1k=500\$

Prices for US CA GB mix(or US only):

200=350\$,

1k=1500\$.

I can do only x64 updates for additional money.

Crypt - 25\$ (warranty 6 hours).

We can use a middle man that we both agree upon. The buyer will pay any MM fees.

Terms of Service:

1. Your file must be FUD and working. It is not my responsibility to check if your bot is working.
2. Ransomware/Lockers are not allowed.
3. Your file must be under 5Mb.
4. Write what you need, when you add me in Jabber(XMPP).
5. I only accept BTC, ETH, XMR.

FAQ:

Spoiler [\(Click to View\)](#)

Is it loads, installs or updates?

It's updates.

Why you named updates loads sometimes in your thread?

I see that a lot of people don't know what is updates.

I selling:

Unique updates from Smoke Loader. Your bots will be removed from admin panel of loader after installing your file.

Why you don't accept ransomware?

It's very aggressive and it's bad for traffic sources

Can you start loads directly from exploit pack?

I can't do it because the biggest part of updates is from landing page. I can't count updates without loader.

Can you do test?

I can do small free test for people with good reputation for review of service.

Can you make refund if I will ask for it?

Yes, I can do refund for remaining updates in 24 hours after request.

Smokes load rate isnt that, sorry to burst your bubble, i have the loader and it isnt even close. Also if it is true loads once again you dont give two fucks on what your clients do with it unless your selling them installs as loads.

kubuntu_ru - March 13, 2017, 2:50 am

What is your rate on Smoke Loader? I think that successful rate can be different for a lot of reasons - size of file, how many AV detect file, what doing your file. If you don't trust me, you can use escrow service(middleman) for protect your money.

You must not know who i am or how long i have been in the business but i can assure you i have been around much longer than your self who just found this bot am i right? When we spread we are fud and we update every 12 hrs. And use polymorphic crypts. So when you say your getting 80% from smoke loader it is hard to believe unless you have a god like copy of it, its best execution rate we have seen and many others was 65-70%. Your better off using andro which has a higher execution rate and stability trumps smoke.

kubuntu_ru - March 13, 2017, 2:15 pm

May be you are right, Andromeda Loader working better, but Smoke Loader have bigger success % from exploit pack at least on my traffic. I don't using loader for making big online of bots, I using it only for good success percent from exploit pack to file of my client.

After installing file, bot removing from admin panel of loader. My traffic is 70% from "exchangers traffic"(I isn't sure that it's correctly translate this word to English), 30% from FTP access. Traffic from FTP making loads more quality, but I can't control other 70%. I can just tell that on average loads are quality and I don't installing few files on 1 bot.

I write true here, if somebody seller tell you that 100% no other software on bots - it's false. Seller can't control bots and check what software already may be installed on bot.

Furorem - June 7, 2017, 12:09 am

Correct me if im wrong:

Installs = Bots wich are given/sold for multiple users.

Updates = Bots what you will give/sell for one person and those will be removed from your loader.

Loads = Bots wich are directly sent from Exploit Kit, what means those are 100% fresh and not havent visited on your loader.

tomboy182 - June 7, 2017, 12:53 am

2. Ransomware/Lockers are not allowed.

What exactly prevents someone from using your service and masking the payload?

slowesthacks - August 29, 2018, 5:20 am

Roughly how long will these last? I know it mostly depends on the software (I'll be using a silent miner), but just want a ballpark figure. Thanks.

(Aug 29, 2018 05:20 AM)slowesthacks Wrote: [\[CITE\]](#) Roughly how long will these last?I haven't statistics about life time of bots. I don't know what is your miner, what is percent of CPU\GPU will be used by your miner and what crypt you are using. You can make small order for test.

TommySalami - September 20, 2018, 10:47 am

anyone know how HQ the USA loads are?

TraderBitcoin - October 18, 2018, 12:44 am
