Thread: [Don't buy any ewhore ebooks. \[Willing to Mentor for free\]](#)

Kashira - March 8, 2017, 7:31 am

I'm pretty sure this thread is fine, just want to prevent those to not buy something that's not completely worth it or free information.

Before considering buying an ewhore ebook, please just know you can find majority of the information for free and don't need to spend money. I'd only recommend if ANYTHING spending money on a pack.

If you need help starting to ewhore I'll gladly do this for anyone if necessary.

My skype is live:wewgeg1 (If you add me, I'll accept, but its your responsibility to msg me after add)

Don't waste your money.

Previous thread I did 3 months back~ <https://hackforums.net/showthread.php?tid=5500715>

Well i can agree that many ebooks etc are not new info and often are not original overall. but that does not include all of them. and i will of course say that packs are worth buying if they are good.. beacause i sell them too... ?

I've had members that's have bought 3 different ebooks from this section and of course told me it was sh*t. I'd make one myself if people wanted me to, but like I said before you can find the typical information for free.

Anyways, like I said before its all free information.

Some ebooks have private methods, why is your free information better? (Not thread trashing, just asking a serious question)

Most of those "private" methods you'll find out over time and even think about yourself. The information/mentoring I provide is to get people started and if they have questions I can answer them majority of the time.

(Mar 8, 2017 04:11 PM)ASAC Schrader Wrote: [\[CITE\]](#) Some ebooks have private methods, why is your free information better? (Not thread trashing, just asking a serious question)

Many ebooks get leaked anyway, or shared, or mass sold with auto buy links

Most methods have competition, you just have to copy them and improve, if you're the best competition doesn't matter! But also, it will push you to start testing areas yourself and find your own low competitive niches within ewhoirng

Hey, Kashira, I appreciate your help, you're very helpful from what I see.

I have a problem, I'm not new to eWhoring, but I feel like I lost the flow.

I don't even remember how I did it back in August 2015, I earned a lot, just basic kik eWhoring with basic kik sites.

I have a feeling that I'm struggling doing it now, don't even know if I'm doing it long enough to earn, you feel me?

These days I would ewhore doing the same thing, but for like 1-3 hours late at night, I would earn 20-80, depending on my luck, I'd post my username on 3 sites about 2-3 times. Traffic seems so low sometimes. So I just think I lost the touch. How much time do you spend, how often do you post and do you post on every single site you know?

I'm not asking for traffic, I use the traffic I know, traffic everyone knows. Did I lost my touch? Cause I really feel lazy and unmotivated, or it was just really easier back then? Thanks!

Anyways, like I said before its all free information. Definitely gonna have to agree with you on this. The value of eBooks are a joke. In my opinion you should find your own sources of traffic and ways to be unique.

countless number of people because of it.

Better emulator, less chats un-opened, modded Kik, prevent trying to spam/macro/bot help that.
Sometimes it may not matter even when doing these things, because it can still crash.
