Thread: [Ohtalku! The place for anime.](#)

Black Hole - March 8, 2017, 9:12 pm

Hello everyone! Just wanted to update everyone on a new project I am undertaking called Ohtalku. It is an anime and manga news and event coverage channel that I am making in hopes of making it easier to stay current with all forms of otaku fandom.

Please check out the main page on youtube and subscribe if you think it's something you'd enjoy! I will be covering anime conventions, local events and meets and hopefully I will be able to interview giants in the industry. Please come and join along and keep current with everything anime!

I really like the name. I recommend turning the audio up a bit and maybe changing the background music to something different. The current techno stuff you have going is alright, but it doesn't fit the theme of anime and manga. I know you have to worry about copyright claims but I'm sure you can find something.

With the audio you can use Audacity to turn the sound up, add a very slight boost to the bass, and use the noise cancellation feature to clear up any background fuzz.

I subscribed.

Thanks man! I've been asking around for how to improve the quality of not only sound but video as well. Are you on discord?

I think this is your best episode thus far.

Great audio, you're easily understandable, and you're not monotone.

I also like the edits, they're not as obvious as before. Great work dude.

Why does your siggy and other thingy say "suicide"?

Are you aware of it saying that?

Ghost bombing in the US market doesn't surprise me at all. China should make up the difference though.

Black Hole - April 11, 2017, 9:40 pm

I made a new welcome video!

What do you think?

tweety - April 11, 2017, 9:57 pm

You should definitely play some background music while your talking, feels like it would fill in the silence when you pause or change topics.

Noted and fixed. This next episode coming out tomorrow will help quell these issues. Any and all criticism is welcome!

Yui-Senpai - April 13, 2017, 12:33 pm

Great video, I hope Death Note series will be good but doubt it.

I feel like the episodes are getting better. You are starting to sound more natural when you speak instead of a more stick to the script which make it appealing to watch.

Good work, keep going at it.

Thanks, that means a lot! Funny enough...this is the first episode where I actually use a script!!

Yui-Senpai - April 18, 2017, 8:27 am

I watch live actions and most of them suck however I kinda have high hopes for FMB.
