Thread: [insomDOWNLOADER | Free Fud Downloader](#)

Goldmouth - March 9, 2017, 2:09 pm

insomDOWNLOADER issa little project I've been working on. I would always use a downloader to spread and keep my stub safe. Its FUD now and I will try my best to keep it that way as I sharpen my vb.net skillz.

FUD 3/19/17

I don't understand why you guys keep releasing your loaders and such. It won't be FUD for long if you release it, no matter how hard you try. There's so many here on HF it just seems silly to add another one to the mix unless you're just looking for acclamations.

Im learning to code, so id like for it to become detected so i can learn to fud it, and 2 some peeps could use it. What have you contributed with?

Good job, it looks good. GL with learning to code

akisx - March 9, 2017, 9:15 pm

The GUI seems quite nice LOL.

You should add UA support, a simple .htaccess modification will prevent your file being analyzed by automated malware scanners / faggots.

That'll prevent scrapers and indexes but it's still best to encrypt it on the host (like how I do).

Most of the time you don't have to worry about it but I take extra precautions.
