Thread: [Don't know why my other thread was closed but here's how I don't get limited](#)

G.O.A.T - March 9, 2017, 5:43 pm

I eWhore into my Main PayPal

How to set it up? Easy. Get a domain make the email payments@domainname.com

Attach a secondary email being your eWhore and get all the payments sent there just make it something weird like sonicxo@hotmail.com

And make it a business PayPal with ur last name + payments so if your last name was Spencer it would be Spencer Payments

have nice day :3

just verify with ur real docs etc real bank acc

They really do take a close look at the billing information, so it would be wise to think it through before starting.

(Mar 9, 2017 06:55 PM)G.O.A.T Wrote: [\[CITE\]](#) yea just use a digital item selling site delete the product every couple days re create urls and just make stuff up when you get limited they'll ask for links just recreate fake products, I usually go to sellfy.com and just copy product layouts :)

Got it, but rip this thread as this isn't allowed to be talked about.
