Inspired by Lana Del Rey's music video for "Love" (P.S. I fucking love this song).

I was just messing around, it's a WIP.

I'm not really too happy with it tbh. Looks a bit weird and maybe slightly OTT. I usually go for more subtle effects in sigs. The meteor looks weird and distracting imo.

Idk, urgh.

Version 2 (no meteor):

Might do a small case study/kinda tutorial on what I did, and might release the PSD (prob not the AEP tho).

It hasn't got my name on it, so feel free to steal it if you like it lmao.

I like both of them! I really like Lana Del Rey also, it took her a while to release a new song but this is just some good music! I like your designs as they remind me of vaporwave edits! Good job!

I'm probably going to work as a stagehand and showcaller for Lana Del Rey in the summer which I am pretty stoked about.

Edit: Sorry, the signature is cool as well just make it a tad bit larger. ?

Nice. Hope you have a great time with her.

It's already at the max height man. I had to apply some pretty strong vignette to ensure it blends in

with HF bg, which is why it looks smal..

Very nice, I liked both :)

Maybe would make meteor less abit but just my opinion
