Thread: [Batch PONG](#)

**?CARUs L?VE?™** - March 10, 2017, 11:46 am

Hello all ^-^

Today I made PONG in batch ^-^ It was quite easy to do since more than half of the work was already done for me with all of the FUNCTIONS from the link below :)

If you're curious about how the game works, or if you want to make your own, I've been considering making video tutorials creating all sorts of things and post them here :) Hope you all enjoy!

Thank you! I've been trying to show that batch is more capable than people think, and that you can actually do some neat things i you're creative with it :)
