Thread: [Blezzedd Scams \\$180, Lies, Pretends To Be Victim, Hasn't Refunded in 4 Month, 2599742](#)

???? - March 10, 2017, 1:33 pm

I have been waiting 4 months now for [Blezzedd](#) [b][b]Jean Paul Sartre[/b]. I've been extremely patient and reasonable with him, saying ok to his excuses of having homework, resetting computer etc etc. I think it's time I make this now.

[/b]

- Send him privnote asking to buy crypter source for \$180, stated that I wanted it working and FUDed.
- He agrees, I pay. I say again that I want it working and FUD (he doesnt deliver on either of these)
- Now he says it isnt FUD
- I get errors when trying to compile, he hadnt sent me all the files
- I tell him that there are detections
- He doesn't deny this, says he will deliver it to me "tomorrow" after his homework LOL (THIS WAS 4 MONTHS AGO, STILL HAS NOT DELIVERED).

- He had to "reset his computer" ok man
- His friend will deliver it to me FUD < LIE, STILL HASNT
- "I will deliver it FUD to you ?" < well its been 4 months, im still waiting...
- "no where in our original deal did I state it would be FUD on delivery" < Lie, he even confirmed I said this in previous PMS ^^^^^^^^^^^^^^^^^

- "I am prepared to give you a full refund" < still waiting on this, he's just been buying time. really doubt he was ever going to refund me..
- "If I sell my new crypter you will get your \$180 back as soon as I make it" < <https://hackforums.net/showthread.php?tid=5556263> he's been selling it for weeks now. refund me pls?

- "So I could send you all my bitcoin now" < I say yes
- "you are getting a little too pushy". < I have been EXTREMELY patient and reasonable, waiting 4 months for you to either deliver this promised product or to refund me.
- Says I am "harrassing" him, threatens to open community alert. lol ok. He tries to make himself a victim even though he is the one who took money from me.

literally none of ur statements hold up. its simple as this -

I pay \$180 for crypter supposed to be FUD
u confirm this in PMs, then change it after I pay
youve been promising a refund for months
have not fulfilled

refund me and this all goes away, because this is not going to go away by itself.

I believe the dispute comes down to this:

- Was the seller offering a FUD service or not?

You paid him before him mentioning it was FUD in PM's, maybe it said it was FUD on his thread?
What's your position on this is what I'd like to know, are you claiming his thread stated it was FUD or did you assume that? Nonetheless, I think you should get some form of refund or else receive the FUD product.

I said I wanted it FUD, he gave me his payment info. After I pay he says it isn't FUD. He even confirmed that I said I wanted it FUD in later PMs.

There was no thread behind this deal.

I just want to get a refund so we can both walk away from this. He still comes out with a profit from holding my bitcoin all these months as its raised.. I just want my \$180 back.

Just curious, how much does it normally cost to get something FUD? Wondering if maybe someone can step in, FUD it, dude pays guy to FUD it, then you keep your original deal and dude still comes out with something for the source.

Yeah, I understand. Just was curious because that is his argument atm.

I think he should pay up the \$130 in bitcoin he has right now and decide where to go from there.

You should have probably had requested a refund immediately, being patient with people sometimes makes the deal disputes a little bit more complex. Nonetheless, it seems he has gone to sleep now, hopefully we can resolve this when he wakes up tomorrow morning.

Still see no proof of you asking for it FUD. If this is how it goes, I can make a privnote asking for a CE of \$5 BTC for \$5 PP and then later claim that it was \$5 BTC for \$20k PP and open a deal dispute.

Keep in mind that 1 detection from ESET is much better than 7 detections from ESET, AVG, Avast, McAfee, Kaspersky, Comodo, and MalwareBytes, which was what GhostCrypter was like, which you kept selling despite Deluxe telling you to stop, as shown here:

<https://hackforums.net/showthread.php?tid=5421378&pid=52626345#pid52626345>

He offered to FUD it for you afterward because he was a nice person, not because he was obligated to. This invalidates your point that he agreed to it. Additionally, you asked him to make it FUD after the deal was finished and the transaction happened, which also invalidates your point.

1 detection = you steal \$180 from him

That is not how it work. Why don't you refund all of your customers who have all of those detections then? Deluxe never stole anything from you, why don't you open a thread on that then?

Where is the part where he says he would refund you if it is not FUD? I am not seeing it anywhere.

You are accusing him of lying here:

But he isn't? <https://hackforums.net/showthread.php?tid=5475639> This happened when he tried to get it FUD for you.

And then you proceeded to trashing his sales, which is a blatant violation of the forums rule. Perhaps you should spend some times reading the help doc.

You then proceeded to try and extort even more money from him as shown here in the alert: <https://i.imgur.com/DxMAYsF.png>

WTF? Perhaps you should refrain from making useless arguments. And yes, I am a part of a "circle jerk", as you might refer to it, the same way you are a part of 4 deal disputes: <https://i.imgur.com/RToE9s6.png> and of which only 1 got resolved (and that was a tiny amount of \$10).

You and your bullshitting is getting overboard. Either provide proof of the original deal or gtfo.

I wanted to buy the crystal crypter source for \$180 in privnote. you already confirmed this. i also included in the privnote that i wanted it working and FUD, I even re confirmed this right after I sent. If you had a problem with this you could have immediately refunded me and not sent me the source, simple as that.

GhostCrypter is the crypter you sold. It continued to be sold, despite development and refudding having stopped. It was FUD during the first week. After that, it was always around 4/35.

This is old thread, but just in case someone searches the UID before dealing with Blezzedd and find this community alert, I'd like to say that this report is invalid. Blezzedd never stated in his thread/deal that it was FUD. The deal was totally legit.

/Invalid
