TooQuick - March 10, 2017, 6:26 pm

The scan was the website...

Mr Meeseeks - March 10, 2017, 6:27 pm

This is fishier than my ex

Yes but just because is too old it's not Useless

TooQuick - March 10, 2017, 6:31 pm

Young man scan the files it self then edit your thread.

ElmagoLoko - March 10, 2017, 6:32 pm

You gave us the download link of the software & the scan report, and where exactly is the tutorial? I know how to handle this but what about beginners or people who have no clue? Either post at the appropriate section either provide the tutorial you are missing.

Have a nice day buddy! ?

Have a nice day buddy! ?

Do you not read the pdf file right?

It's the first link bro.

Effexion - March 16, 2017, 9:01 am

Have you got a source code for this? I wouldn't mind taking a look.

AnonOpz - March 19, 2017, 11:49 am

EDIT...nevermind sorted it

hAiryPAulsAck - March 22, 2017, 5:18 am

Simple. Run it under sandboxie and you have a large chance of avoiding a trial of any sort, or you could run it in a VM (depending on what it is, and if it's anything nefarious you should probably do it in a VM regardless), and the most amateur of the options would be to use software specifically designed for trial resetting etc.

Even if he did, I don't think he would share it that easily though. I might be wrong, nonetheless have a nice day buddy. Regards, Hopsin ?
