Thread: [# Multiply Strategy?](#)

Abstractmadn3ss - March 11, 2017, 3:10 am

Anyone actually make any decent BTC with # a strategy?

If so can you provide proof? I would love to know your strategy but if you don't want to share, that's cool to. Just looking for validation that i'm not looking into something stupid here...

?

the # is freebitco DOT in

that's the link.. not trying to advertise here, the post makes no sense if they don't know what site i'm talking about..

No idea what you're looking for, you're finding a way to multiply your BTC?

daeyezofhoruz - March 11, 2017, 10:08 am

If you want to make money you have to put in money and just go with the flow be patient. Honestly I think Bitcoin is too high to make any real decent money. I can make more return on Ethereum or another altcoin. There are highs and lows each day with every coin. Invest in a few. When one is low, take the coin with most profit, sell and use that money to buy the coin that is low and repeat. You can also sit on your money which is fine, less risky but your money will not move as fast.

Mefie - March 12, 2017, 11:43 am

Could you explain what you were thinking of when writing "# Multiply Strategy"? One thing I know for sure, there is not any sure method to multiply your BTC and if someone says it, you should raise your caution. There are exciting methods with fair risks to try, though. That is why I am interested in what you mean with this "# Multiply Strategy".

UPDATE: OK. I found that site, now my question is answered. But what I wrote I still agree with.

I only thought this was potentially legit because it's a gambling system and the house has 5% edge.. it's more than other sites but regardless, my initial question is still valid. Does anyone know of someone who has started with a "free amount" of BTC like 170 satoshi for example, and turned it into a few btc? Some claim to have done it but I haven't seen proof and I wanted to know if there was a fool proof long term strategy.

So far I haven't found anything.

I agree with the idea of investing in some alt coin that's currently low, sell when it's high and move onto the next low alt coin.. seems legit.

If there was a fool proof long term stratergy those sites wouldn't be open anymore....

It's gambling, there are smart ways to gamble, but gambling isn't smart
