Stormzy is cancer? okay, it was a part of the Caesar Quest (crypto challenge #1) but no need for it now.. Or is there?

Aigrod - March 12, 2017, 3:19 pm

I got pretty far but now I don't have clue on what to do now.

Elitas - March 12, 2017, 3:21 pm

In relation to the "house": You must first find the origins of the hint as well as the true meaning of the

origin. The house is a common interpretation of the meanings of the origin.

S?pre?e - March 12, 2017, 3:38 pm

Really enjoying the challenge so far :)

Nice that you agreed with me about the hints too!

Let's see if I can make it to the leaderboard

Yes, just 1 hint so far, hoping I won't need to give another.

Remember to find the interpretations of the "house" and try it.

Looks like the next step is stenography. Oh no.

LordCoder - March 12, 2017, 4:12 pm

Stuck at the bracelet step... Unsure if we need to retrieve a file or an HTML.

Bracelet requires thinking. That's all I'll say about that. Is that you just need to 'think'.

Lmk where the rest of you are at!

Elitas - March 12, 2017, 4:26 pm

Still not solved! Anyone else on the bracelet?

Elitas - March 12, 2017, 5:41 pm

Make sure to try this out. 0 winners thus far!!

This is less about cryptography and more about riddles.

Can't figure out the final countdown shizwa

Posting site is down, do we need it?

Hint?

Hint?

Site's up.

The final part is a riddle but does require cryptographical knowledge/coding.

That's all the hints you're getting!

Pulz - March 13, 2017, 6:33 am

I think its time for some more hints? ;)

All of us have been stuck at the final page since yesterday.

Elitas - March 13, 2017, 6:35 am

In regards to the final page:

"Use what you've learned from past travels, just 3 hours ago"

Remember that when this was made, it was 3 hours after the last one (Caesar's quest).

Caesar's quest is still on the website and is still available for those who want to lookover what happened, but that's not incredibly relevant.

I merely mentioned "3 hours ago" to iterate the importance of the number 3.

Good luck to all those still trying!

Blue Shadow - March 13, 2017, 2:07 pm

Elitas - March 13, 2017, 2:09 pm

HINT: "Remember to roll back 3, using what you've learned from Caesar. I'll be sitting on my throne awaiting the messenger's ring."

How stupid does a customer have to be to think that they should pay \$20 now to insure their purchase of some stupid grill? If it breaks it would probably take 10 bucks to fix it. sigh Why must K-mart compromise my honor? Ack! I spoke its name! flee Alright I'm Baaaa~ack! That's right. Back from the dead like a fiery phoenix of nonsense and ranting, I return from months and months of not posting (and to make things even more interesting i won't mention anywhere else on the site that I made a new lte post!) So, today's topic is just on the concept of writing. I go to a very math oriented college (i'm gonna be a programmer) so the people here....just....really...suck at writing. Completely! happy So for a small nominal \$50* fee I shall teach you, the Hypothetical Reader, how to write grade A quality stories, guaranteed! Did you glitch out and post in the wrong place?

Elitas - March 13, 2017, 3:25 pm

2 winners already have completed the task! One more left to come...

C?rrupt - March 13, 2017, 3:26 pm
