Thread: [\[New Features!\] Imminent Monitor 5 Release - Scaleable, Customisable, Beautiful](#)

Sho?kwave - March 12, 2017, 4:45 pm

Hello, and welcome to the Imminent Monitor 5 Official Release thread.

After spending weeks in beta, Imminent Monitor 5 is finally perfect and ready for a full blown release.

Imminent Monitor 5 is everything you want in a software update; the entire user interface has been revamped to use html/css/js which means that the interface is completely open to the public to be customised to your hearts content.

You can view some images of our beautiful high dpi scaling ui under this spoiler:

Spoiler [\(Click to View\)](#)

You can also view more screenshots at <https://imminentmethods.net/gallery.php>

The entire 5.0 changelog:

With Imminent Monitor 5, comes new features:

Imminent Monitor 5 comes with a brilliant new feature which will allow you to administrate your clients from any location with the "Imminent Monitor Dedicated Server"

The Dedicated Server Passthrough allows you to spawn an Imminent Monitor server on a windows VPS, that will accept client connections regardless if your PC is online or not.

Once your the Dedicated Server Passthrough is set up on your VPS you can connect to it from Imminent Monitor using the Dedicated Server Manager in Imminent Monitor

Screenshot:

Once you are connected to the Dedicated Server any client that connects to it will be forwarded to you, this essentially eliminates the need for portforwarding.

Here is a video also explaining this powerful feature (best viewed in fullscreen HD)

Beautiful update, Shockwave. Can't wait to properly play with this and see what else you have lined up!

s?hane - March 12, 2017, 4:49 pm

Really nice additions to IM.

This is only the beginning, with the current new UI structure, features are easier to add, we currently have around 6 brand new features in development that are going to be absolutely massive.

GammaDune - March 12, 2017, 4:52 pm

Can't wait to get home and try this out. I'm sure I won't be disappointed Shockwave never lets me down!

Nick (Name) - March 12, 2017, 5:04 pm

Now you got the UI updated, cant wait to see what you got up your sleeves for proper remote administration! Keep up the good work and many others will keep up the support!

Hopsin - March 12, 2017, 5:05 pm

Very nice mate. Give the community what they really need! Have a nice day buddy!

RastaManKing - March 12, 2017, 5:17 pm

very nice.. the ui looks very very clean and modern! im going to have to start using my IM more often.. nice job!

This is extremely interesting! Only other rat that has a dedicated server like this is Orcus (that I know of), I might try Imminent now for a while (my Windows VPS would always reset my password and it was a massive pain in the ass)

Hey guys!

Please stop bumping this thread. IMM is in fact a dead product for now. Not sure what actually happen to OP but this is not the thread to discuss that.

Im saying this because new members might buy the service not knowing IMM is down (No support granted anymore) .

If you have any other questions related to the IMM RaT drop me a PM i will be happy to help!

Kind Regards

Imminent Monitor was unable to connect to the licensing server! Please check that your internet is connected.

If your internet is connected please check your firewall/anti-virus isn't blocking Imminent Monitors connection!

If everything seems fine from your end, our licensing server may be down!
