Thread: [Forge Compatible - Anything for 1.10.2?](#)

shibou_akuma - March 13, 2017, 5:53 am

Hey guys,

Just looking for a forge compatible client for 1.10.2 unfortunately the best I can find is rodentLL for version 1.8. Is the developer going to update to 1.10.2 or can someone point me in the direction of another possibility - short of building it myself?

I am even willing to pay money for it but that's for another thread in a different section.

Vape has a 1.10.1 version

shibou_akuma - March 16, 2017, 3:07 am

It seems that vape only goes up to 1.8.9 at least according to the website.
