Thread: [fill messagebox using combobox vb.net](#)

adenfr - March 13, 2017, 11:22 am

hello there

im going to create messagebox genaratore and all is correct just i went to show test message using 2 textbox and 4 combobox and each combobox is contain of all proprietes of messagebox so in my buttons i create this code but still not working

```
MessageBox.Show(txtstring.Text, txttitil.Text, cmbbutton.SelectedItem, cmbtyap.SelectedItem, cmbbutdefullt.SelectedItem, cmblayout.SelectedItem)
```

any help

it say i need to convert the selected items from integer to string !!!!

Set as data source from:

Cast back to whatever type when showing message box.

yes this is worked fine

but i means MessageBoxIcon .. i have duplicate it item

```
cmbtyap.DataSource = [Enum].GetValues(GetType(MessageBoxIcon))
```
