Thread: [XMPP MyCode](#)

Omniscient - March 13, 2017, 12:52 pm

Added an XMPP mycode today.

Code [xmpp]1@hackforums.im[/xmpp]
[1@hackforums.im](#)

Should be compatible with any XMPP service. Post your XMPP address and let's try it. :)

Note: The HF IM XMPP service is not compatible with other XMPP services due to our requirement for OTR encryption.

Add me:

[1915596@hackforums.im](#)

?

that explains a lot.

NurSpec - March 13, 2017, 12:54 pm

That's a fantastic update. I need to set mine up now.

SOVRN - March 13, 2017, 12:55 pm

The address wasn't understood

Firefox doesn't know how to open this address, because one of the following protocols (xmpp) isn't associated with any program or is not allowed in this context.

You might need to install other software to open this address.

Do you have an xmpp client installed?

Why do you keep posting despite being banned twice now?

Great addition to mycodes! Thanks for this.

<https://hackforums.im> redirects to <https://hackforums.nef/> for me, anybody else?

EDIT:

Somebody go to "hackforums.im?roster" in their address bar and see if it redirects to hackforums.nef

SOVRN - March 13, 2017, 1:01 pm

i have swift installed, and this isn't working

Leroy Jethro Gibbs - March 13, 2017, 1:04 pm

I'm glad you liked my suggestion. I love the implementation of it!

Philip J. Fry - March 13, 2017, 1:06 pm

ahhh such a good add 3363094@hackforums.im

SOVRN - March 13, 2017, 1:08 pm

404 remote server not found

Aigrod - March 13, 2017, 1:09 pm

Nice feature, lets test it

You clearly don't understand what he said. Hackforums.im isn't able to communicate to xmpp.jp. You can't use your HF XMPP account to talk to someone with a XMPP.JP account.

I don't have a HF XMPP account. How do I get one?

J?son - March 13, 2017, 1:30 pm

lets try this out

so the administrator can close my account for a "deal dispute" when I never dealt on this site?
sounds good

Charger - March 13, 2017, 2:00 pm

Does the font look big for anyone else? I'm on mobile if that matters.

This seems neat-o, let's get it.

webdev77 - March 13, 2017, 2:55 pm

947940@hackforums.im

Let's eradicate skype once and for all on HF.

Charger - March 13, 2017, 4:12 pm

Strange, it looks fine when in a signature but is raised up quite a bit on posts.

Anyone else see that?

kawaii - March 13, 2017, 4:16 pm

marisa@hackforums.im

It works! Thank you! ?

Crowley - March 13, 2017, 4:38 pm

This is awesome!

I just got into xmpp a couple days ago.. haven't actually gone deep into checking it out yet so this is pretty cool overall. thanks omni! ?

Add me for a good time.

Skorp - March 14, 2017, 2:19 am

Oh, you fancy ?

1292605@hackforums.im

Wyatt Garcia - March 14, 2017, 7:25 am

Nice feature :)

Could one be made for Discord? I mean there is already Skype one and many people are using Discord here as well.

Looks the same as the others for me.

Vitani - March 14, 2017, 8:30 am

This is actually really cool. I'll definitely start using this in the near future.

Thanks for the feature Omni.

Rooftops - March 14, 2017, 8:39 am

378230@hackforums.im neato!

M?xim - March 14, 2017, 9:53 am

I used to have a hf XMPP but nobody wanted to chat so I removed it):

But it is a nice feature. Might have to make a new one just because of that.

Keep it up ?

Null - March 15, 2017, 1:36 pm

seems like a great addition, but i prefer discord over XMPP and Skype.
