Thread: [In need of a C4D/AE template to be rendered and edited!](#)

NYCVN - March 13, 2017, 10:26 pm

Hey, HackForums.

Ever felt that feeling of where you got a fantastic idea for YouTube and want to carry it out? Yeah, I got that vibe.

I would do this myself, but my computer will not at all render this fast.
(prebuilt \$200 CAD laptop with low-end specs)

The Intro Template: [HERE](#)

The Download: [HERE](#)

What do I want the text to be? NYCVN

Leave the color as is.

If you don't have the font in the video, don't stress. I will be happy with a similar font! (or whatever you think looks nice)

This might sound difficult but all you have to do is change the text in C4D and work a little bit of render magic in AE. Wouldn't even take a while to render if you have around a i3 prebuilt, since the video is 10 seconds and the C4D file doesn't move too much or have flashy colors.

Thank you very much if you can fulfill this request, I have tried asking on other relevant forums but it's been a hassle.

Let me know if anything occurs.

Have a good day!

Still looking for this, thank you very much

NYCVN - March 17, 2017, 7:20 pm

Don't need this anymore, just rendered while I went to school and when I slept!

case closed.
