Thread: [Is there a way ro make money with Raspberry PI?](#)

memehack - March 14, 2017, 4:45 am

i prefer not BTC but if that's the best way making money i guesa ill try it.

I've had a Raspberry Pi 3 laying around since like christmas and idk what to do. Just wanna make som easy cash as an Idle project or something. Any good ideas?

?

The Pi(s) don't remotely have the resources to make mining worthwhile. You could try to automate a rewards program. Like how Twitch bits can be earned and cashed out to a streamer or how Bing rewards pays out in gadgets for using their search engine. Or you could just sell the Pi on ebay :P

I'm kinda with this guy I don't see how it could be effective but someone did develop a mining OS for it at <https://minepeon.com/> so there's that.

captainspalding - March 16, 2017, 4:13 pm

Using an RPi for BTC mining is beyond ineffective, it is utterly useless. You will make no money and will be paying to power an RPi that is burning cycles for no reason. Suggesting using an RPi for BTC mining is lazy trolling.

If you need more confirmation of this:
