Thanks for posting this good luck to all my number will be 347. Seems like a scam but, prove me wrong. (at the time of this post) if your choosing a number between 0-500 then there is a 25.6% chance that you have to pay someone money and a .02% chance of an individual winning. But, if you keep on rolling until you get someone's number, then each person has a 0.789% chance of

winning.
