Most things on CR are pretty good. My advise would be just to go A-Z (since the selection is not significantly large) and add anything that looks interesting to your queue. The "popular" section of CR might help a little too.

They Reduced Bitrate like 70% on a number of servers

i never knew why people would pay for crunchy roll as most of the stuff on there is available free and on other sites and the 'exclusive' stuff they have ends up on different sites later on anyways

i never knew why people would pay for crunchy roll as 95% of the stuff on there is available free and on other sites and the 5% 'exclusive' stuff they have ends up on different sites later on anyways Cuz they ain't thug pirates like us famalam

and yes I do support the INDUHSTREE with muh gundams
