Thread: [Access To Private CSGO Surf Server - Tier 1-6](#)

630 - March 15, 2017, 9:04 pm

Introduction:

Hello I hope that it's cool that I am posting this. If not it can be removed. No sweat. I have been renting out a private surf server on CSGO for the past 6 months and as of recently it has been fairly unused. I am giving access to all members in The Brotherhood and Skill to this server. I have a few rules with it and I will list them below along with some information about the server. If I see members who are not in the group on the server without my permission this whole thing will be shut down. Please respect my rules, the server, and other players.

Server Information:

Server Name: Tool's Private Surf (Tier 1-6)

Server IP: 192.223.30.89:27015

Password: 9979

Tick Rate: 85

Slots: 6

Server Location: Chicago, IL

I rent this server from a friend. The times record / achieved on the server will be saved on my server as well as the main server. I will list the public servers below in case you want to surf there as well.

Website: <http://snksrv.com/>

Easy Surf: Tier 1-2: 74.91.113.236:27015

Advance Surf: 74.91.113.133:27015

1v1 Server: 74.91.119.186:27015

Bunny Hop: 162.248.92.80:27015

KZ Climb: 162.248.92.83:27015

Rules: Please do not share the IP with anyone outside of the group.

No Kitsune 2 (lags the living shit out of everything)

Absolutely no cheating... You'll be banned and this thread will be deleted.

No toxicity

No racism

No mic spam

I pay for it therefore I have priority. I have full map control and slot control.

Helpful Commands: !r = reset

!nominate = nominate specific map

!rtv = rock the vote

!resetknife = resets knife if dropped

!nvg = night vision

!spec = spectate

!hide = hide other players

!back = return from !spec without losing current run position

!maptop = see leaderboards

!s X = X being a number will skip you to certain stages
!stuck = get you out of stuck position and back to current stage

How to connect:

Connect through console (not sure if working):

Code connect 192.223.30.89:27015; password 9979or

Add server to favorites list and connect as seen below.

If you run into any problems or have questions / map suggestions please let me know. Thank you.

Testing it now, i like how they didn't improve the private servers interface since early 1.6 days.

As of right now the server is down. I stopped paying for the hosting and forgot to renew it. I will repay 3-6 months of the server on Wednesday and it should be back up and running by Friday. I will close the thread for now and update the information when it is back up.
