Thread: [Free direct EXE Hosting required](#)

Hello All,

Now that Pomfcats has stopped exe hosting what hosting sites are people using for your exe stub files for direct download.

Many Thanks ?

Your best bet would be to get a VPS and setup a webserver on it. Then just upload your exe to it. You can control what's allowed and not allowed.

You can also use the website in my sig.

It's tailored to hosting EXE files.

Yea, no problem.

Let me know if you have any issues.
