Hello, I'm Eden. I will be hooking up anyone with a RAT Setup if they are needing/wanting it.

These are the RAT's I have experience with.

? insomRAT ?
? NJRAT ?
? Cybergate ?
? NanoCore ?
? Imminent Monitor ?
? Babylon ?
? Many More ?

I have used each and every RAT I have typed in the small list.

For you to be able to get a set up hook me up with a PM with that format posted above. Do not post your Skype out publicly because people will try to impersonate. From what I have seen there are many impostors of many people on this forums.

Code Skype:

Have TeamViewer?:

RAT Client:

DNS Server Setup?:

Ports Forwarded?:

Every setup I do will be done via TeamViewer. Please [CLICK](#) here to download TeamViewer if you do not have it installed.

Useful links:

Please do not use rats for illegal services.

Well being my Hack drive got nuked the other day, and I must recreate it.

I am sure I don't need a whole lot of help, but if you want a vouch, I need to re-download LL, IM, Nano and Babylon and get them reconfigured.

Nice to see another help desk around though, a lot of users will benefit from this.

And here we have 2 new members, only a month apart displaying so varied concepts.

The one who offers a service freely, and hopefully without malicious intent, and the other whos thinking all about the coin. Interesting....
