Thread: [RUST InGame Resolver \[Works With Other Games\]](#)

merkle - March 17, 2017, 5:58 pm

Steam Ingame IP Resolver

[Works with all steam games that use p2p INGAME voice chat ie:

<http://steampowered.com/steamworks/gameservices.php>]

ie: RUST

WORKING ON:

RUST [TESTED]

CONAN EXILES [untested but it uses the same chat system]

4 Licenses left on HexPay Auto Store

<https://hexpay.org/p/mhh4c>

See VIDEO FIRST:

[Video: <https://www.youtube.com/watch?v=OipA7E3jutw>]

I am new here, I would like to be a long time contributor.

Please see FAQ, See "how does this work".

BOOTER IS JUST FOR SHOW, AN EXAMPLE WHAT YOU CAN DO WITH IP, THIS IS A RESOLVER THAT IS ALL.

ETHERNET ONLY !!

TEXT AD:

Spoiler ([Click to View](#))

This is a an in game IP and Location finder for any STEAM game that uses the steam chat, players do not need to be on your buddy list, this will show the ip, country, etc of anyone within 100m of you, its up to you what you do with that IP..... Can also be used as a in game RADAR, fully external, fully detached, fully UD forever!!

- Shows IP of players in 100m range
- Geolocation
- State / Country / Suburb
- works INGAME !
- They dont need to be on your steam list or friends
- Get IP of pesky ZERG Clans
- FULL UD
- Fully External
- USE AS ESP in FPS like RUST !!

BOOTER IS JUST FOR SHOW, A EXMAPLE WHAT YOU CAN DO WITH IP, THIS IS A RESOLVER THAT IS ALL.

BUY / PURCHASE:

Spoiler ([Click to View](#))

<https://hexpay.org/p/mhh4c>

FAQ:

Spoiler ([Click to View](#))

CAN I BE BANNED FOR THIS?

Never, no, its not possible, I will spare you the details but let me assure you this is completely external.

IS THIS CONFIRMED TO BE WORKING AS OF TODAY?

Sure is, The software is currently working as of March 2017.

DOES THIS WORK ON ANY GAME?

No only the games that use STEAMS in-game voice chat, ie: RUST !! (plenty more)

HOW DOES THIS WORK??

Uses public method anyone can do this with Wireshark, but this is self-contained and has a pretty GUI and you don't need Wireshark I will tell you it uses packet sniffing and steam's in game chat uses p2p.....

This works on all games using <http://steampowered.com/steamworks/gameservices.php> for ingame voice chat

CAN I BUY WITH PAYPAL?

Sure see this link

<https://99bitcoins.com/buying-bitcoins-with-paypal-a-practical-guide/>

WHAT OPERATING SYSTEM DOES THIS WORK ON?

Only works on Windows with ETHERNET connection.

IS THIS EASY TO USE?

Simple, start app and let it work its magic

Limited due to the sensitivity of this project.

This is different from a steam friends list phone call resolver.

This resolves everyone IN GAME up to 100m !!!!!

ETHERNET ONLY !!

vouch copy gone.

Twitch - March 17, 2017, 6:37 pm

Dam this looks pretty sick ill wait for someone to vouch

?onderland - March 17, 2017, 7:26 pm

Does this work for ark, That would be interesting.

Lexy- - March 17, 2017, 7:52 pm

What are the odds you'd be giving out a voucher copy to a little ole person like me? Flutters eyelashes

Kaleb - March 17, 2017, 7:53 pm

This can be done easily using already existing applications.
Like just WireShark will do this and it's free.

merkle - March 17, 2017, 9:48 pm

Yep it says that in FAQ. But his is a stand alone pritty gui, stand alone dosnt need wireshark, etc...

Kicking - March 17, 2017, 10:11 pm

Just purchased. Waiting for the download from Hex and will review when I get it.

merkle - March 17, 2017, 10:35 pm

(Mar 17, 2017 07:26 PM)Onyx_ Wrote: [\[CITE\]](#) Does this work for ark, That would be interesting.
Its possible I don't have so cant test, i cant find out if they use steams chat api.
All games that use steams in game chat api this will work on, it sniffs the peer to peer chat.

(Mar 17, 2017 10:11 PM)Kicking Wrote: [\[CITE\]](#) Just purchased. Waiting for the download from Hex and will review when I get it.
Thanks for your support, I appreciate it, once payment confirms on blockchain HexPay should release your link + key.
If there are any issues please don't hesitate to contact me, code may be slightly buggy /beta but im here to repatch and update if needed,

Please let me know how you find the tool and let me know if you want me to add any more functionality.

Booter button is a example of what can be done as it says in advertisement, it dosnt work for i could get in big trouble for that, but its easy to google "free stresstester", as mentioned this only works on ETHERNET.

Have Phun ! and remember, please read README.TXT

?onderland - March 17, 2017, 10:37 pm

You should surely give someone with ark a vouch copy to test it as that would open a HUGE market for you in the PvP ark scene, currently all of us big tribes just ddos entire servers when we raid.

merkle - March 17, 2017, 11:53 pm

Trying to do some research now on arc, if i can't find anything ill consider having someone test for a vouch copy.

EDIT:

Works in connan exiles (untested but it uses the same chat system)

xcode5 - March 18, 2017, 1:35 am

Would this work for rocket league??

Millimeter Peter - March 18, 2017, 1:57 am

(Mar 18, 2017 01:35 AM)xcode5 Wrote: [\[CITE\]](#) Would this work for rocket league??
no

itsMeCherry - March 18, 2017, 3:16 am

Does this work for gmod??

y.flicka - March 18, 2017, 3:20 am

This does look really nice I am thinking about buying this right now

FPSgamer - March 18, 2017, 3:58 am

Just purchased this aswell, waiting for download.

I really do wonder if it's possible to use in csgo since they use steam voice chat aswell.

UPDATE: I just attempted to use this on csgo, css, gmod and can confirm that it doesn't not worked so far.

Will try on rust soon to see if it even works for me at all.

UPDATE 2: I just attempted to use it on Rust and it works great, so to all rust users with booters, this is your chance to get your endgame gear within your 5 first minutes of gameplay.

itsMeCherry - March 18, 2017, 4:23 am

Please tell us all popular games this works on. If it works for gmod i buy

merkle - March 18, 2017, 4:53 am

Thanks for the positive feedback guys,

I have not tested this against any other games but if it uses p2p for its in-game voice chat then it should.

Gmod it should work, team games like csgo, rocket league maybe not. If someone has access to all these games and more installed let me know and ill do you special license for testing.

Those that ask if they can use paypal, please see this link:

<https://99bitcoins.com/buying-bitcoins-with-paypal-a-practical-guide/>

link me?

edit: nvm this shit doesnt work on gmod or csgo

merkle - March 18, 2017, 5:57 am

(Mar 18, 2017 05:05 AM)ASMR Wrote: [\[CITE\]](#) [You people still aware that the method is completely public?](#)

As you can see its been made clear, in the OP, FAQ and in follow up posts.

This is a pritty GUI completely stand alone from wireshark.

People can sniff their own traffic using wireshark sure...

this is automated and geolocate's on the fly...

Its been made clear but thanks for your input mate.

It can also be used as a radar, wallhacks persay...

And is compleatly FUD and never will be detected ... ever... not against TOS, a safe HACK persay...

For the sake of full transparency:

Like I said earlier you can just use WireShark to do this. I don't see why you'd spend \$10 on an app for it (not trying to trash your thread OP it just really doesn't make sense to me).

Obviously some people are satisfied with the product though so it's chill.

merkle - March 18, 2017, 5:19 pm

Its been made clear in the OP, FAQ and 4 follow up posts get over your fucken self

FPSgamer - April 14, 2017, 3:39 am

I've been using the IP resolver for the past month now and i can confirm that this is a way more usefull product then what the wireshark method is due to the efficiency that this program has.

This can easily be used for resolving someone's ip but it also works as a proximity alert were you get warned whenever someone's closeby.

So if you're tired of someone killing you from behind whilst gathering, then fear not because this program will help you out with it.

The best part of this program is that it isn't even against rusts terms so it won't even count as a hack.

P.S, to the people who want to "stress test their home network", there are some booters out there if you just search "forum server stress tesing" through google.

merkle - April 18, 2017, 7:20 pm

Ye, this is sad. I mean, there's some sniffers with good GUI and also a few that are lightweight so actually I am unsure of why peoples pay for that, I guess they don't want to bother searching after those.

Wireshark is also sometimes hard to use, depending on the amount of packets being sent/received you'll take some time to find the ip being used by the p2p thing.

I'd still recommend you guys to take a look at process monitor.

merkle - October 31, 2017, 9:10 pm

BUMP

The full source code + rights + project is for sale.

There are still a couple licenses.

PM ME

zohanhacks - October 31, 2017, 10:55 pm

he is most likely selling it due to it breaking with net work encryption

merkle - December 4, 2017, 3:28 am

Seems to be working still now worries.....

How would encryption stop the p2p network packets from being sniffed???

O_o

I was selling cause i wanted to LONG BTC... thats all... not cause it dosnt work, it still does no worries.

I should open it to more licenses, the old selly page went down if people are interested let me know ill stick some more keys up.

Mate your HexPay is down, it shut down months ago lol

And encryption isn't it, Rust dev (Facepunch) are planning to replace the entire voice system in their roadmap but it will be months away as they have a lot more to do

merkle - October 17, 2018, 1:10 am
