Thread: [3D TIC TAC TOE AI](#)

FinnTheHuman - March 17, 2017, 7:55 pm

<https://github.com/OntologicalSin/3D-Tic-Tac-Toe>

This is a game I created. I haven't updated it in a while, and haven't really shown it to anyone, as I don't know whether or not it's something to be proud of.

Please let me know what you think, any constructive criticism, praise, or straight criticism is greatly appreciated. I am a high school student working to become a software engineer or another person in the field of computer science.

Stealth™ - March 22, 2017, 7:31 pm

There's a lot of criticism to give regarding this.

Code /*

* @param: none

* @return: the board that was populated

*/

public int getBoard()

{return boardX;}

Javadoc comments don't follow proper conventions, neither does brace-spacing.

Code if(turnlog.letMeKnow(turnlog.getP1Turns()) && !turnlog.letMeKnow(turnlog.getP2Turns()))

{

Location loc = turnlog.getNeed(turnlog.getP1Turns());

if((!turnlog.getP1Turns().contains(loc)&&!turnlog.getP2Turns().contains(loc))&&!loc.equals(new

Location(0,0)))

returnMe = loc;

else

{

returnMe = last();

}

}

Spacing within conditions is inconsistent with proper conventions and the rest of the program, and omitting braces for if-statements.

Not utilizing the final identifier in Location.java, as well as in other classes.

Not packaging the program into folders, etc. Everything is pretty sloppy.

What do you mean by that?

udpcon - March 24, 2017, 6:44 pm

I think he's asking you if you think his application is good despite the syntactical inconsistencies.

Stealth™ - March 24, 2017, 7:13 pm

Oh, I'm too lazy to download and run it lol.

Ah, got us a top tier Stealth response right here. Too stupid to even into reading comprehension.

This has been noticed by me as well, knowledge of syntax clearly reflects experience in software development (being sarcastic, but I do understand that a programmer who doesn't know how to properly communicate isn't a very good programmer)

Yeah, and when they act like they're the shit all because they paid like \$20 to write some stupid certification exam doesn't help.

[Oh and when they go to community college and spew whatever their lecturer is saying without actually understanding what he's talking about](#)

Do you have any qualifications? (Stealth might not but do you?)

3cli??pse - March 27, 2017, 1:43 pm

I have an actual job in the field, and I went to a real school.
