Why not, its garry's mod

User - March 22, 2017, 8:08 pm

Some features should be implimented, some things should be polished a bit, overall it's not a bad cheat.

Better than most cheats you'll find lying around.

Vouch.

"\$6.00 per 7 days"

\$20.00 per 999 years

You thinking about adding more features? I can give you a huge list of features that people will buy the product instantly. I like the all features but, it just needs more! :D
Good luck with sales my dude.

You should make a fading door wallhack.
Then you could know how hard it is to raid a base for example.

Lmao, do you have prop ESP by any chance? Would be fun in prop hunt shooting them little fuckers!

AntiProverb - March 31, 2017, 3:54 pm

Pointless web based GUI? You mean constant network traffic to and from that process? This would be a good way to hide a RAT, if anyone ever tried...

formatme - April 7, 2017, 7:15 pm

Pointless? what... we use a web-based GUI for a reason and if you cant figure that out you are clueless.
