Thread: [New Development Website | Cryo Development](#)

SethCodes - March 17, 2017, 10:07 pm

Hello! I was looking for people to vouch for my website, I was wondering if you guys liked the design and other stuff, I just recently added an SQL system with notifications using microtime and all that stuff, tell me if you like it! ?

The Link is: cryodev(dot)net

The site looks kind of basic or from a common template :x Also some of the pages don't work yet, but I'm sure you're still working on it.

For someone who offers web design services I suppose that you should make a custom template, and I mean... a nice one.

And jumbotron, and navbar, and inputs, and euuh, I guess you're using bootstrap for everything no ?

Using bootstrap is not bad imo
