If u feel u can trust i made this thread where u can DL

clean DarkComet versions 4, 4.2F, 5.1, 5.2F, 5.3 and 5.3.1F
I will keep the downloadlinks up to date.

For the pack: tmearn.com/Zg6N

PASSWORD = thankyou

BECAUSE I RECEIVED SO MANY COMPLAINTS ABOUT THE MD5 CHECKSUM I DECIDED TO REMOVE THE SEPARATE RAR FILES

MANY DID NOT UNDERSTAND AFTER COUNTLESS TIMES OF REPEATING IT OVER AND OVER AGAIN THAT IF YOU REPACK A RAR FILE ITS MD5 CAN CHANGE...SO NOW IF YOU WANT THE CORRECT MD5 YOU WILL HAVE TO DOWNLOAD THE FULL PACK.

SORRY PEEPZ BUT I GOT TIRED OF EXPLAINING IT ALL OVER AND OVER AGAIN.

password for the pack = thankyou

No need to post and PM just download what u need and use on own risk.

This is a mediafirelink, no shitchash so plz...

Leave a thnks if u like and to keep this threath alive.

Since several members are complaining about this download link thinking this software has a backdoor or is not the official one, I downloaded it and compared both MD5.

Uh but DC is outdated, vulnerable, and shit. Why do people feel like they need to use this??

Prophett - March 18, 2017, 6:12 am

Pretty sure this is a copy and paste of another user's thread except you've changed the download

links.
