Thread: [The ewhoring community is by far the absolute worst community I've ever been with.](#)

Honey S?ngh - March 18, 2017, 8:49 am

It's honestly pissing me off to the point where I feel like writing a rant thread.

No your method won't work the same for everyone.

Nobody gives a fuck about your earnings, neither does anyone give a fuck about how your method is the best.

The no insulting or no talking down on methods threads is absolutely fucking ridiculous.

If I want to be able to prove that this method is just another method of a method I should be able to do that.

If I want to be up front and absolutely honest I want to be able to do that.

I try to share whichever methods I can, what I do with my SEing and nothing works for everyone..It's ridiculous when people are saying OH THIS METHOD WILL MAKE U TONS no it's all about luck of traffic and how u talk to people but even then it's mostly about luck.

I'm going to have a ton of people screaming that it's different but hey guys keep shoving your earnings in to people's faces and actually not showing anything I'm sure that works as arguments or backs it up.

Furthermore is I don't get what's with the enclosed methods.

Every method will become saturated at one point or another. Every method works different and even using same method given u will not get same results as it's all about luck of traffic.

But people keep shoving your earnings in to people faces.

I'm sure I'm hitting a sore little "button" on your egos when you can't admit the fact that you're wrong (I can be too, I'm new to all of this) but the ewhoring community is completely fucking cancer over all.

It's the worst community I've ever experienced and I've played league of legends and cs:go.

I've been a part of the metal community but nothing really beats this when it comes to ego, full fucking autism and not sharing anything and yes men.

Thank you so much for the wall of text. I have just emailed Donald Trump and told him that he can finally build his wall without spending too much money. You sir, are hired!

Yeah they also scam a lot of people a day while they're ewhoring. A lot of the scammers on HF come from the ewhore/ratting section because the have no morales..

If you think that community sucks, then you should play rust.

I don't really like e-whoring at all, dirty, desperate times.

Pretty sure it will get closed whenever our Lord and Saviour Brian Krebs makes a blog post about it.

You kind of have a point, I've been ewhoring off and on for about 2 and a half years, not very actively anymore though. Yes, most of the people are pretty cancerous that ewhore, but that's mainly because a lot of immature teenagers are the majority of the section. An insane amount of people brag about fake earnings, I don't care, and you shouldn't either. Let them do what they want when you actually spend time earning the money instead of faking it to raise your self esteem like 80% of the section.

Also, don't spend too much time with actual ewhoring, it fucks with your mind sometimes. Just ewhore enough to where you'll have a decent amount of money to invest into something that'll ACTUALLY make you some big bucks.

That's my opinion on your thread and ewhoring in general.

sh4dow.gg - March 18, 2017, 9:24 am

I was about to talk about csgo community but oh yea..

Well you're right, whenever someone attempts to talk down on a methods thread their post just gets deleted. It's super ridiculous. It's just a scam made by this community to milk the newbies.

Honey S?ngh - March 18, 2017, 9:27 am

I actually want to give back to the community but most people are fucking retards that are pussies.

Elitas - March 18, 2017, 9:52 am

I actually don't see OP's point. Lots of people are "agreeing" that eWhoring is "toxic", etc, but then they're missing OP's actual point. OP does eWhore, he even mentioned him giving methods out about eWhoring and he posts a lot in that section. Whether eWhoring is good or bad or immoral has nothing to do with whatever "point" OP has, which I'm hoping he can clarify what he's actually saying and what he thinks should be done about it.
