Thread: [Trying to come up with a brand/business name..](#)

Designer - March 18, 2017, 4:07 pm

The business is basically a logo generator. An online service where you can automatically get a logo created for your company.

I've tried a ton of names with 'logo' in the name, but most .com's are already taken. Anyone got any tips to come up with a name, or even better, have a name in mind? ?

I tried to come with a name but all of them do seem taken like you said.

However this .com is available: logofastnow.com

I mean its decent :)

Good luck sir.
