Hello Guys,

I'm really sucks at Photoshop. But I have to create a cover for a free drum & bass release.

If someone have a bit spare time, please take a look and try to make it more professional.

Thanks so much! If you need the logo, background, anything hit me up!

In my personal opinion there is nothing wrong with that, it's simplistic and smooth. However I am a novice at photoshop so I may not be the best judge.
