Thread: [Extra Pages - permission to things we should not have?](#)

Xeenon - March 19, 2017, 3:05 pm

Hey, everyone.

I was on extras.php as I was looking for the sales tags page when I decided to try and see which of the extra pages I had access to.

To my surprise, I apparently had access to the [Paid Stickies List](#), which is staff-only.

I am unaware if this is on purpose, and it is just the extra pages that need updating with what upgraded members are allowed to be viewing and what not.

(?°??)(???? - March 19, 2017, 3:08 pm

I think Omni knows about it, it's been mentioned before. I think he's trying to get rid of it anyways.

Confirmation that the issue is known: <https://hackforums.net/showthread.php?tid=5545995>

Apparently the page is going to be removed entirely in the future.

Apparently the page is going to be removed entirely in the future. Ah, perfect. Going to close this then. Thanks!
