This can be applied worldwide, but you can only collect Amazon.com gift cards, so if you're not from US you have either to resell them or create an amazon.com account and purchase goods with Digital Delivery. ?

Does this guide include anything blackhat (IE carding, cracked accounts, etc.)? Does it have to do with Social Engineering?

Negative, SE is one of most common ways to get gift cards but this method is not about it.

Thanks for your interest ?

You can't go wrong purchasing this ebook.

I've already read it , and it's more than enough for the money.

1. Everything is step by step carefully explained.
2. You don't need any special skills.
3. You basically start from 0.
4. The method is simple but very smart.
5. You can do this over and over again without any risk.
6. They offer support.
7. Easy to learn.
8. Special bonuses ;)
9. The method is immortal and will serve you as long as you want.

Big thanks to the author for sharing the method. Keep up the good work. :)

I may not seem as experienced as others on HF forum but I have 2+ years of experience with Amazon Gift Cards , buying and reselling them is literally what I used to do for living , and I would love to see what u have to offer here and leave an actual unbiased detailed review. Let me know

RoyRogersMcFreely - March 21, 2017, 2:28 pm

Does this involve completing surveys on smartphone or computer?

If its \$15 per couple days can we do it multiple times a day with multiple accounts?

Nope, and I have to correct you about "timing" as it refers to the time required to apply this method, not to get paid.

Op was kind enough to give me a vouch copy of this eBook days before it was Release on HF. I got time to try this out, and i successfully execute it and started to earn.

My First impression after reading the book was, well this got 10 Pages its long but when you finish reading it you will know why it's long, and your will know that you're good to go. Well Op Made the Guide very clear and noob friendly. I Assure you, Anyone can do this, no matter your age or experience. you dont need to have special skill or even if you didn't do anything regarding Amazon, you will be able to Setup and Start to Earn in No Time.

Regarding the Method I would say it's an unsaturated method, I have never seen this method before, This Method is Simple and it's Easy to setup and Execute, hence With the OP'S support you're on Fire to Earn.

I'm really impressed with this Method. And for those who considering buying this, it's definitely worth the money, and you will earn more than \$50 bucks within days. I guarantee you that. I give my Vouch to This eBook and Ombra.

I was lucky enough to receive a copy of Ombra's method and he never seems to fail.

The method takes a bit of time to get started, but once started it's a repetitive process that can make you a decent amount of money from these gift cards. The method is laid out for you in a nice 10 page .pdf explaining each step with pictures and examples.

Overall nice work!

I had contacted Ombra about his method, and I have purchased the e-book.

I have read over this method about 10 or so times just to make sure I have the full understanding of this method, and I have to say its actually a really easy semi-autopilot method! Once you get started, it isn't hard to be making a minimum of \$100 every few days.

I would definitely recomend you pick up this method while it's on sale! Even at the price point of \$30 there is virtually a unlimited supply of gift cards here!

Thanks for your feedback, I'm glad you're satisfied with your purchase as I worked hard to make everything clear and show the best pattern to work.

The promotional price of \$20 will be active for a whole month, so people still have the chance to get this deal.

I can say it's not one of the known method to get gift cards, that's because it doesn't focus on the gift cards itself but you get it as a result of the process.

In short, this doesn't involve SE (like I said some posts above) nor carding - which is even forbidden by site rules.

bdawn - March 22, 2017, 11:50 am

Interesting...any chance that amazon would patch this or worse, suspend my account? (If its a loophole)

Also, how long does the initial setup take? (Reading the book excluded)

Finally, does it involve me having to purchase anything on amazon?

Amazon won't patch this because it's not involved with this method.

The only thing you have to do at Amazon.com is redeeming the gift cards (unless you want to sell them, of course).

The configurational steps can be done within minutes, they're linked to the new email address that will be created.

Is it blackhat related? Does it involve me connecting anything personal to it? As in, do I have to call someone?

Also, what methods of payment do you accept?

This is not BH, does not require your personal data nor calling somebody.

Accepted methods are PayPal and Bitcoin (which includes an additional 10% discount).

I was lucky enough to receive a vouch copy of this method. I've read through it, and I can easily tell you that you will make a profit if you put in the time.

I'm not saying this takes a lot of time, but many people believe that every method is automatic.

The language was great, Ombra is great, the method is new (I haven't seen it public). I can guarantee you that you will get your money back if you put in the time and ask Ombra any questions you may have. I'm sure he will gladly assist you.

Kify - March 22, 2017, 2:32 pm

Bought this, heres my honest review

I am not affiliated with the seller in any way

Grammar: 9/10

-Finally an eBook that isnt written with broken English.

Ease of use: 7/10

-You might need to reread the eBook a couple of times before you fully understand it.

I'm way below 18 years old yet I used the method before and earned alot. (Method itself is not public, just knew it somehow. I'm 99% sure that you reading this dont know it though as its private)

I am giving this eBook a 8/10

Q | Will this actually earn me money?

A | Considering I actually used this myself, yes it WILL earn you money

Q | Does this have anything to do with G2A/Kinguin/Admitsee/other college notes sharing sites?

A | No it does not.

Q | Will my gc get revoked/chargedback?

A | It wont get revoked or anything so you can safely resell/use it.

Q | How much can I earn with this?

A | Minimum you can earn is \$15, max. I personally earned is \$50 in one time. This is reusable so if youre lucky you can get multiple \$50's, \$25's or \$15's.

Not sure if \$100's are available however this method is reusable so you can earn way more than that.

Some things to note:

You do have to wait some time to actually be able to get the cards however its 100% guaranteed. Like I said I used this myself.

Digged up my old Amazon account, the balance here is all made within 25 days (took me 30 mins a day, sometimes 5-10 but never more than 1 hour)

(Refreshed so no element inspect bullshit)

This eBook has my vouch and is confirmed by me as a working method

Just bought this ebook a few minutes ago, the transaction to purchase it was really fast and easy.

Seller is extremely easy to contact and got back to me within seconds.

As others have mentioned it is a 10 page pdf, however it contains lots of pictures and it's extremely easy to understand as well as follow the steps provided.

Method seems really unique and doesn't appear to be something that would be saturated. I'll update my review on this in a week from today with more information as to whether or not I've been successful at making some money.

Hi, like I've said within the first pages, this method can be applied worldwide but only allow to obtain amazon.COM cards.

About requirements you won't need anything, as this will start from the creation of a new mailbox ?

CloUd - April 6, 2017, 1:44 am

Purchased this guide and just finished reading. It's very well written and I understood it all in one read. You'll definitely be able get back 5x of your money on your first go.

What this is:

- 1) A simple loophole around a system
- 2) Takes some time at first to start but after your first run you can bring in more money daily
- 3 It requires a bit of work, but if you're willing to put it in you could make 300-600\$ a month

What this isn't

- 1) An immediate return on your money
- 2) Not going to bring you 1000s a month

I recommend this to someone who is in school, that doesn't want a real job and would just like to make a couple hundred dollars more a month, if you really push it maybe 500-600\$
Its a great side income, but it requires daily work for it to be really efficient

I don't recommend this for someone who thinks this will make them rich or doesn't have much time to devote daily.

I personally can't see myself using this method as it just requires too much effort(not time) for 300-600\$ more a month, as I rather spent my time doing something else

I would say after your initial run with just 1 hour or so a day, you can make the 600\$ a month

I just picked up this ebook and read it. It was filled with pictures and there is no way to get confused. There is also no tl;dr for it, so read all the pages. Well done ebook, well done extras. He put a lot of work into this.

It will work, but it's not a solid method you can use for years to come. If you want it, get it now. It's a matter of time before this method is saturated. It would be saturated if many HF users and users

from elsewhere were all doing this at once.

The money u are going to earn is 10x the amount of effort you will put for gift-cards, one of the best one time investment you can make is in this e-book.

Well it's less than a month since I'm selling this and I personally believe saturation won't occur that soon. We have at least a 3 months deadline but I expect it will last longer.

Gift cards can be redeemed in your own account as I'm usual to do, however if you feel comfortable using a different one (or sell the cards to other people) you're good to go.

Got a vouch copy, here is my honest review

Grammar:

you can understand the ebook, you wont have problems with that

Ease of use:

Its easy to use, everybody can do it, however do not expect to buy and get grants within minutes, you will need to dedicate time when doing it, however it will be worth for sure.

Investment:

You dont need to invest at all, however you might want to buy a vpn, or you can just use a free one.

Support:

I would like to mention that the support is just great, its not just that you have OP's help, you also get access to his forum, you will be able to get even more help.

Method:

Well, not much to say, the method is great and can be really profitable, i would have sold the method for more money ?

MY REVIEW AFTER PURCHASING THE "AMAZON DEALER":

Hi, i bought it for (don't know) maybe 2 weeks ago or something like this and i want to review it now!!

I began to read the eBook (extremely nice structured) and i was very happy to discovered such a unique and nice method! It is different as that what i read so far. It isn't a shitty buy cheap and sell expensive guide or anything like this. It is a money worth investment at all! Because the potential of money that you can get is amazing! And the best thing about it is, that you just have to follow the guide in the eBook to achieve that. You literally don't need your brain to do this!

And i definitely want to say that the support of OMBRA is the best support and nicest that i've ever got!! This guy really take care of his customers and help them without any bad or bothering behavior.

Absolutely worth the money!

MY RATING:

Ebook Quality: 10/10

This eBook is the nicest structured eBook that i've ever seen. Thumbs up!?

Method: 9/10

This method that Ombra shows to his customers is amazing. Because i never saw any method like that. Really nice and it works if you do it. But it doesn't work immediately.

Support: 10/10

I never had a better support as Ombra's support!!! NEVER!

Earnings:

It takes some time and because of that i earned nothing so far but i am pretty sure that i will be successful.

Really annoying that I just got an email that my payment was received but still no download link. You got no delivery email because I see no delivery email address has been specified with your order:

This can either be because you forgot to add it, or forgot to press the "update" button before pressing a payment button or due to a lag while you have been forwarded to CoinPayments, which caused some data to be lost (the \$email value).

Anyway, I am sending you a PM containing the package ?

If you have any question regarding Amazon Dealer you can hit me up via private message or use the contact form at roguemarket.org ?

Ombra - May 24, 2017, 4:30 pm

\$10 OFF discount has been enabled once again, I may just stick to \$19.95 at this point.

Ombra - May 27, 2017, 2:39 am

I have just replied all contact emails I got, if you have further questions I will take care of you immediately while I'm online.

You can obtain gift cards with little to no effort using the method in this guide. Support is provided during all steps and you get access to free sms verifications as bonus content. ?

Along with the method you will get an unique invitation key to join our private group where this

method is being applied. This means you will always be covered by support not just from me but even from other members ?

Ombra - June 1, 2017, 2:34 am

I have just re-applied the \$10 OFF discount. If you're interested in purchasing, this is the best time :)

Ombra - June 4, 2017, 3:48 pm

I've decided to keep the current discount active. You can still get this at \$19.95 instead of \$30. ?

From now on, sales price will remain stuck at \$19.95. Thread design will be edited soon. Enjoy. ?

You can get them daily once it has been started successfully, as this works following a loop. First time will take more time.

Time is less than 30 minutes per day, you can get the \$20 back after the first loop is concluded - the first time takes about 2 weeks. Then this works even daily. Just to be clean.

Yeah this is not purely whitehat. It works in worldwide (so UK is fine) but only allows you to get amazon.COM cards

Price may be subject to change during the following days as I'm thinking to re-structure how this works.

I noticed some minor issues regarding orders management and IPN coming from CoinPayments.

These have been fixed and delivery via my built-in autobuy engine will now be processed faster than in past.

Note that all Bitcoin payments are and will be processed slowly in any case if the miner fee you add isn't enough.

I have been asked if by saying "instances" I'm referring to running a piece of software.

No software is needed.

If you wanna use the gift cards yourself, then you will need real data inside your Amazon account, else they won't be able to complete the shipping.

If you just wanna resell the cards then you don't even need an Amazon account ?

There's a "Support" link in header, you could have just used it to talk with me via email.

I received your two payments and understood where the issue was when I saw your first dispute, until there it was fine. But when I saw the second payment disputed too, I started thinking you just wanted to scam me, that's why I replied to both of them and banned your account.

However, now there are 2 PayPal claims and I didn't really mean to ban you.
Any idea about how to fix this? Can you close one of them at least?

No to both. This does not involve SEing Amazon support or asking people for 4 digits of their cards, that's scamming and it is not included in the guide, if that's what you were wondering :)

Ombra - September 14, 2017, 7:19 am

I keep being told that delivery email aren't sent out from my server.. it's not so, unless you forget to add you delivery email, of course.

Check this:

If you create an account at Rogue Market before completing your payment for the product you're gonna buy, it will be sent to your internal inbox, located at (edit: removed due to HF contracts policy) just like Hack Forums.

If you complete your payment before creating an account, then delivery email will be sent to your chosen address. Make sure to use a valid one.

Last thing: if you pay via Bitcoin, don't expect immediate delivery because CoinPayments won't allow my server to automatically send the product until your payment receives 2 confirmations.

I hope this will be helpful, thank you ?

A query beforehand - some were mentioning that this would be saturated in the coming months a good few months back. Is that the case? Realistically, how much can you make per month with an hour of work per day?

There were some minor changes in the service used to grab the cards, but the method still works

1. I'm selling a method to get cards, not (anymore) cards
2. Price is not negotiable unless I enable offers

Ombra - September 23, 2017, 5:20 pm

Since I recently got asked if this guide got saturated, I think it's good to post it publicly.

The method is still working and you can safely apply it. The sub-group hosted on my own website, using this method, moved elsewhere. That's why price remained stuck at \$19.95 instead of the original \$29.95

However, I'm the one providing the most important parts for this (phone verifications & global support) so you can be confident that I will be active for you, before and after purchasing :Blackhat:

Cards can either be redeemed inside your own account or sold to other people, without chance for them to be revoked.

As I said inside the support email, next time add a delivery email before proceeding with payment or the autobuy won't work. You cannot come to me complaining because you didn't get the product if you didn't specify where it had to be sent.

Theocritus - February 27, 2018, 7:50 pm

Bought this product a while back and here is my short review

So this method as advertized is a guide on how to acquire Amazon gift cards for free.

This method will take you at least 20 days before you can receive your first gift card. After that point you can get one or so daily, if you have set up enough accounts in preparation to do so.

This method is original and i can see how it would work in principle.

The 20 day setup time is quite long and because of that many members might not even bother trying it out fully.

It should also be said that it will require a decent time investment before you will be even close to seeing any money coming in. On that point i would say it is probably not worth the hassle for you if you have very limited free time in your everyday life.

The main problem of this method though is glaringly obvious once you start trying to set it up properly. This method requires that multiple people besides yourself help you in the process of getting the gift cards in the end. Now it is technically possible for you to not need other people's help to get this method working, but that would require a much higher level of time investment as well as almost a headache of things to keep track of in my opinion.

Now as i said you need help from others for this method to work well overall, and the big problem with that is that there simply are not enough people using this method at all at the moment, so you can't get that help you so dearly need. When i started with this method there was at most only one other using the method still, and therefore i had basically no help at all getting things ready to get my gift cards.

This resulted in me trying to do it all on my own. I decided to start 3 accounts to interact with each other, and hoped that that would be enough to get everything going around so i could at least get a gift card or two in the end. But this was clearly not enough. As some other person in the method group said you should use at least 6-7 accounts if you are doing it by yourself to make it work, and that person was probably correct.

Me only using those few accounts for everything needed ended with all of them being banned within a week or so of setting it all up.

Now after those first 3 accounts were banned i never went back to the method to try it again. I Personally saw no point in it. The time i would need to invest to have a chance of making it work was just much, much too high.

Keep in mind that only having 3 accounts active still took hours of time investment to keep up the schedule of the method so to speak.

Now OP was Kind enough to offer me a 50% refund at one point when i pointed out the issues i was facing with the method, so kudos to him for that.

Also if it was not already obvious i did in the end not make anything from this method, and since i never intend to try it again, i will not do so in future either.

Now with all that said let's conclude this review.

As i have said i do believe this method can work fairly well in principle. But as i also said, at this time it simply does not due to the issues mentioned above.

If this method worked properly, and the issue above was not present, then i could probably have said it was overall worth the price and time investment needed. But since that is not the case i can simply not recommend you buy this product at this time.

If the issues of this method are at some point fixed, and it sees a resurgence of users using the method at the same time, then, and only then would i say this might be worth a purchase.

I'm selling 1 copy at \$10 as promotion, price is \$20.

Also, this doesn't allow a living and I can't guarantee anyone to gain that much, as it would require a consistent amount of time to gain more than \$300 per month. The fact that somebody earned \$1900 in a month doesn't mean everyone can do it, but just that it is possible.

damien175 - December 11, 2018, 10:59 am

i bought this ebook a few days ago and here is my honest review

the layout is pritty nice and there is enough pictures for you to understand
the method is pritty smart and unique, i would've never thought about it myself
the support is great
there is no investment needed but it does take some time to set up
it won't be saturated
you can keep earning with this if you create multiple accounts

i would give this method a 10/10 since you will be able to do this unlimited

This is still working and updated in September 2018 due to some changes in the site being used.

About earnings, if you apply this daily you can earn up to \$15 per day I can say. You may get more, but that's the best payout considering invested time imo.

+1 you need 5 group of friends that's willing to put in work to make money nowadays otherwise its almost too much work for little to no return by yourself because the private group chat hasn't had activity in awhile. This method can be used if you're alone, but you would get a significant boost if you have 1 or more people that apply it with you.

I can say that the creation of multiple accounts on a given website is involved in the guide. With a friend you can create them faster, while if you're alone you would take more time ?

1. There isn't a stable amount, depends on your effort.
2. Yes, you can apply this worldwide
3. You need nothing except a mobile to perform some verifications, or be aware that you will need a provider for multiple verifications. I mentioned one inside the guide if you don't have one or don't wanna use your own mobile.

You have redeemed the serial key associated to your transaction 24h ago, as I can see from my logs. Your dispute is fake.

Pick an option, do you want me to:

1. Post the logs and expose you
2. Re-send your serial key, even if you already redeemed it, so that you can claim you've received it.

Overnight, few hours ago, I have received a PayPal payment that didn't appear between the logs. I got the funds in my PayPal account but I see that no order has been generated on my site, leading to no delivery email shipment.

The system is fully automated unless something occurs (connection lags, etc) but in any case, users should contact me if any product isn't shipped within 24h.

P.S. I see you have a contract. If you're the user that sent me the funds, please provide me your PayPal details (preferably via private message) so that I can deliver the guide, instead of losing time with comments that don't help me to track your payment info.

Payment found. As I was assuming, no order has been generated on my side, that's why you didn't get a delivery email.

It has been most likely due to a connection lag while you were being redirected to PayPal payment page.

I'm sending your order details via PM and marking the contract as Completed ?

null_byte - May 10, 2019, 5:34 am

I have purchased, analyzed, and reviewed this method. The following are my findings.

[Overview - Amazon GC All Inclusive Guide]

The guide is very interesting and well-written. I appreciate that throughout, everything is clearly explained, there are loads of screenshots, and the links are all easily accessible. Everything is designed to set you up for success.

[Structure - What am I doing?]

I personally would have written the structure of the ebook differently. While everything is designed to get you going fairly quickly, it would be nice to have a little introduction section that says: "here's what you're about to do". An introductory paragraph that outlined the scope would have been nice. I was about 12 pages in before I realized "ah! Now I know what this is all about." I'm very familiar with the platform used, as I've used it for well over 6 years, but never thought about it from this angle before.

[Criticism - Highly Annoying Format]

My only criticism of the ebook is that it is essentially in picture format, with no way to navigate throughout. Thankfully the eBook itself is only 20 pages. But! When you get to page 20, you must click 19 times to go back to page one. There's no other way, you can't even modify the URL to get you back to the proper page. Highly annoying! There's no table of contents, no index, no thumbnails, nothing. Just click like a crazy person to find the page you need.

[Timing - 3 weeks to 5 weeks for returns]

I see nothing wrong with the timing for ROI. It's a shame some people are so impatient, expecting to make money that same day they employ the method. This method does take time due to its

nature, but it's absolutely worth the effort and wait. I prefer this style in contrast to the flash-in-the-pan, quickly saturated methods that every script-kiddie thinks is brilliant. (perhaps a brilliant waste of time those things are...)

[Overall Impression]

I'd give this ebook and method a 9/10. It's docked one point for the abhorrent lack of navigation. The method itself is sound, unique, and simple to follow. It's been stated in several other posts that you can start from 0 with this method, that is true and makes it very likable.

Ha?a - May 10, 2019, 9:28 am

1. No
2. VPN is not required but it's advised after many times that you've been repeating the method
3. No more than 1 I'd say, no matter about value (ranging from \$15 to \$100)
4. Elaborate
5. No, you will be required to perform some mobile SMS verifications, but I recommend to use an automated service.
6. No.
7. Just if you're gonna use an automated SMS verification service. Ese you can use your own mobile phone(s) if you're willing.
8. No.

1. As I said, the gift cards obtained with this guide are genuine, this means you can redeem them in your own account without issues, without limits.
2. I mentioned mobile verifications because multiple ones will be needed. If you are uncomfortable in using your own number(s) then you will need to buy them online. That's why I linked my

recommended provider inside the guide. \$0.10-0.15 are charged per verification if you go for him, but that was just to give a reference. You're free to pick any other provider

Ombra - July 5, 2019, 10:07 am

(Jul 7, 2019 04:42 PM)PIMP Wrote: [\[CITE\]](#) Hey

1. No investment involved but you will need mobile SMS verifications at a certain point. If you're unfamiliar in using your own number(s) you will need to get them from any provider. I recommended one inside the guide that charges \$0.10-0.15 per verification.

2. No Country specific, you can apply this worldwide, but you can only obtain Amazon.COM cards

3. No

EDIT: Fixed typo.

Maybe you shouldn't open a dispute five minutes after paying for something, if you didn't even understand how purchase process works.

Check your PayPal email and please mark the dispute as resolved.

How much time would it take to do this alone VS in a team and does this require social media?

Just read it cannot be saturated so hoping this is still the case and it's still working?

If so I would hope a discounted copy is still available!

I can't really make a time comparison, essentially working in a team would speed up the process in terms of daily tasks, but the 20 days minimum still applies.

About saturation, I confirm it still can't be saturated abd I don't see this risk coming anytime soon.

For what concerns discounts, I don't have any active one at this time

Thanks for the response. Do these 'tasks' have to be repeated daily to achieve the first gift card? Or just daily if you want to acquire more than 1 in the 20 day period?

Also, I was wondering if I were to follow the exact steps and not be able to get a gift card for whatever reason, if I could get my money back? I have seen this works in the UK but for US gift cards only but was wondering in case it suddenly stopped working?

I will open a contract as soon as my query's are answered :)

Thanks again

1. The method describes a cycle that has to be repeated to obtain every gift card, so tasks have to be repeated
2. According with my policies, refunds depends by the case
3. I do not see this stopping working anytime soon, as stated

Hi,

1)I understand that there is a minimum "waiting" period of 20 days before will we receive the gift card. And that during that "waiting" period we have to fulfill certain tasks. Is my understanding correct?

2)Also, let's say we apply 30 min of work every day, since day 1 when we earned our first gift card (only earned the right to receive it at the end of the 20 day period). If in day 2 for example we earn another gift card, would that mean an extra 30 min of work on day 3 (30 min corresponding to the gift card earned on day 1 and 30 min for the gift card earned on day 2) so that we have to put in 60 min of work or does just working for 30 min (for example) entitle us to receive a gift card every 1/2 days?

3)Is the waiting period a rolling waiting period aka the gift card from day 1 you obtain/redeem on day 21 (for example), the one earned on day 3 you would receive on day 23 so on and so forth? Or do we receive the gift card earned on day 3 on the same date as the one corresponding with day 1?

4)After using the method for so long, and having so many buyers, what would you say is the average amount earned in one month? Does the amount of work you do in one day/days have any impact on your earning potential (more gift cards per day/higher value ones), or does the amount of work reduce your waiting period? If neither, then the work we have to put in is just the bare minimum so that we receive the gift card at the end?

5)Is there a KYC procedure in place? Do we have to submit personal documentation in order to earn/receive/redeem the gift cards?

6)Are we selling a product/service? Are we freelancing a service? Is this related to affiliate links/content lockers of any kind? Gambling/trading ?

Thanks for the info

Lucid - November 30, 2019, 8:31 pm

So is this all still working? What is needed other than just 30 minutes every 2 days? Thanks, looking to buy!

1) Your understanding is correct

2) According with my calculations, you need about 5 minutes to perform the daily activity for each instance that you start, so my 30 minutes already includes multiple instances going on. In general, you should count 5 minutes per day for each instance. Obviously the first or second time you do it, it may take a bit more to get familiar with the process, but after that point it will take significantly less.

3) You will be able to obtain gift card from day 1 on day 21, gift card from day 2 on day 22, gift card from day 3 on day 23 and so on..

4) Average earning depends by the number of instances you apply. It also depends by what you do with the gift cards you obtain, because people may want to resell them, which would lead to a cut in their nominal income too (selling a \$10 obtained gift card at \$8 BTC). The amount of work won't reduce the waiting period, it will only allow you to obtain more gift cards per instance (like 2 gift cards instead of 1 after 20 days)

5) Until this point, no KYC has ever been required or is currently required

6) None of the ones you mentioned

If we constantly work 1 hr/day on this method, with 5 minutes per instance one can only work on 12 instances per hour.

So, if we only get a \$10 gift card for all the 12 instances, we earn a total of \$120 after 20 days, right?

Do you teach us how to exchange these gift cards for Paypal/BTC?

Yes, but that would happen if no new instances are started each day and you stick to your 12 ones.

About exchanging cards: you just google for trusted sites or sell them inside the HF CE section ?

That's on your side, because PayPal likes provide issues to sellers. That's why some automated systems like mine do not deliver products until funds are "in balance"

This method allows to obtain genuine Amazon gift cards that can either be redeemed in your balance or sold to other people. There are no risks involved in using them.

Ombra - February 2, 2020, 1:37 am

For those who are asking. I won't provide any additional vouch copy. It's been years since I started selling Amazon Dealer and I got many feedbacks. Giving out new vouch copies is just ridiculous.

You mention in the OP that the "minimum revenue" is \$10 does this mean I can get gift cards with values of \$50-\$100+? If so can you touch on what is involved so I can get an estimate of the time it will take me? I have to update my thread design as minimum revenue is now \$5. However you can get cards worth up to \$10/25/50/100.

I can't tell what's involved but I've posted that this method takes 20 days minimum to collect each gift card, since you begin the process related to it, with possibility to start multiple processes at the same time.

1. \$5 because it's the easiest

2. Buyers should reply

3. Enough, working with 2-3 people would make the whole process easier

4. It's doable but you will be required to manage multiple accounts on target website, so you have to keep switching your IP. I started alone and was able to work with it.

HackerRvn - March 17, 2020, 11:09 am

In your sales page, you mentioned 30 min of work/day and somewhere in this thread, you said it will take 5 min to complete the everyday task of an Instance.

So,

$(5\text{min}) \times (20\text{days}) = 1 \text{ hour } 40 \text{ minutes}$ of work to earn a \$5 gift card

$(30\text{min}) \times (20\text{days}) = 10 \text{ hours}$ of work to earn over \$30 (with 30min/day work we could only complete on 6 instances)

on top of that, If we exchange these gift cards for actual money, we end up with ~\$25 in hand.

Also if we work alone without a group, our earnings per hour value may go down even further.

am I right?

Please refer me to the "somewhere" I said 5 minutes are needed.

Be aware, don't stick to that 30 minutes. It may take longer the first times you do it just because you still aren't confident about steps to take.

Also, the recommendation is to start a new instance of the process each day. This means that the math you have to do is exponential, while your calculations are linear.

Dear, your post ID is 1395. I stated that this method takes 20 days inside post 1391. 4 posts above this one. Not inside "deep pages". This is currently the LAST page of my thread, with most recent posts. It should always be checked in any thread before making a purchase, you clearly didn't do so.

Coming to your contact request: user contacted me and claimed I lied inside my thread. He also claimed that method required crypto currencies, that are hard to get in his Country.

This is complete bullshit.

- 1) I proven his negligence in purchasing linking him to the last post (the one linked above)
- 2) No crypto currencies are required.

After letting him know this, I claimed he wasn't eligible for a refund. In response, I have been threatened to get a dispute opened and a negative review left not for my fault, but for this idiot not reading what he was purchasing.

I have been forced to send out a refund and now I also get a negative review because you didn't read? Congrats.

You don't need any specific requirement to perform this method, everything starts from a fresh email address that can be registered at your favorite provider. But, later on, you will have to perform SMS verifications. The guide references to a provider that I use which is cheap and reliable (few cents per verification)

Yes this can be performed multiple times per day, but I would recommend starting only 1 process per day, so that they can be handled easily.

I personally never reached the amount obtained by the user that posted that picture, but I deem it's possible to upscale earnings in a consistent way, using automated tools that can assist users.

As side note, working with other people won't lower your profit as each user will get an independent income.

Is it possible to go through the process and not receive a card? Or is it guaranteed that you will be getting something every time you do it?

Considering buying if it still works in 2020? Is this method expected to be patched anytime soon? This method works for people outside of US (Not the giftcards i know that would be us amazon but everything else needed can be done worldwide?)

It may happen that you don't get any card, if the account on method site gets banned/limited. It's not common but may happen if the IP used with the account gets blacklisted

The method still works or I'd stop selling it, imho there's no way to patch it so I don't expect it to stop

working.

Furthermore, it can be used outside US without limitations except the one about getting US cards. (I myself used it and am from EU, but I've sold it to people all around the world and none reported me Country related issues)

I've never been asked for verification or been reported about requested verification, the codes you get are digital so you get an email with all details inside.

The cards aren't purchased so there isn't a receipt/bill.

Hello, you will have to perform some SMS verifications so unless you can get numbers by yourself, you will have to buy them. Chinese ones are usually great and cheap (\$0.05-0.15 each).

In addition to this, after few times you've performed the method it is recommended to use a

VPN/Proxy to alter your IP. Free ones are good, but you may want to go for a paid one.

Purchased this and read through it. Ombra takes you step by step through it with pictures. The method itself will work, although it will take a bit of time. 30 minutes a day sounds about right once you get into the swing of things. It's all very mechanical so you just need to piece everything together like a puzzle and you'll be fine.

As for me, I will start this soon once I get my studying out of the way. I did however look up things in the book that was mentioned (websites etc) and it checks out. So I don't see how this method won't work.

You can obtain cards ranging from \$5 (common) to \$100 (most rare), you don't need investments except the one to buy some SMS verifications from your favorite supplier. I recommend one that charges \$0.05-0.15 per verification inside the guide.

About time, you will have to work 30 minutes each day and you will need 20 days to receive each card. The concept is starting 1 instance of the process each day, so that from day 20 on you will get 1 card per day.

I was asked to leave my review on the thread so here it is.

I would like to start of by saying, if you have a stable source of income that you are happy with, leave. As a matter of fact, don't buy any ebook if that is the case, I bought this because of the pricing and figured it looked like a decent ebook. That I was not disappointed with.

It's quite simple, navigation on the connected site is annoying although understandable due to it's anti-leak protection.

If you want a source of online income, this isn't your passive \$500+ daily lambo in 3 months gurantee, but it does provide the material to get you a return, I'd honestly even go as far as saying you are guranteed to make your money back. Give it time and actually go through with what it walks you through and you will get that return.

Method requires you to have a minimum group of 20 people working together on a pleb tier website to farm the Amazon Gift Cards. Owner ignores the people in his discord for months & his discord has 180 people in it that can all vouch that in its present state this method is not viable. Maybe this method worked a few years back when he posted it but it is not a viable source of income presently.

Ombra advertises his discord server as the foundation for earning with this method yet as you can see he even admits his discord server is nonexistent.

Not sales bashing this method DOES work - but you are required to put in hours of tedious work with 20 other people to split a 10 dollar gift card between you all.

This method is classified as greyhat so don't go for it unless you're aware that some steps may go against ethics.

I have had some connection issues during the past few days. I'm now back and operational. All tickets have been answered.

PayPal has been temporarily disabled. Only taking BTC and ETH right now.

If you'd like to purchase with other currencies than BTC and ETH ask me. I will tell you if the specific currency can be accepted and create a contract manually for you

SMS verifications are required to perform this method and unless you have your own method to get them, you will have to pay somebody to perform them. We're talking about few cents per verification but they still represent an "investment" listening to other users.

Ombra - August 24, 2020, 3:05 am

Before purchasing be aware that this method is grayhat. You won't face any legal issue by performing this, but you may have to go against your ethics.

Ombra - August 26, 2020, 8:07 am

Cards obtained with this method can be used to purchase goods from Amazon.com and then shipped to your own Country (check if international shipping is supported). Don't worry if you can't use them at your local Amazon website.

Ombra - August 30, 2020, 12:07 am

You can use your own IP to perform this method at the beginning, but after 1-3 times I'd recommend switching to a proxy/VPN. It doesn't matter if the service you use is free or paid as long as you can get fresh IPs and a stable connection.

Ombra - September 1, 2020, 10:45 am

My PayPal account has been limited and it has been removed from available payment methods. I'm only taking BTC and ETH until this is fixed. If you wanna pay with other crypto currencies contact me and I will tell you if the specific currency is accepted or not.

Ombra - September 2, 2020, 10:59 am

Please avoid spamming your questions or support request using convo, private messages and email. When I login I do check them all at the same time. Pick your preferred contact method (I generally deal over emails or private messages) and wait for my response. If I do not answer within 24h (usually I take far less than this timing to reply) then you can send again your message or use a different contact method. Contacting me over 1 unique contact method helps me to track all your requests.

Ombra - September 3, 2020, 1:41 pm

Before purchasing be aware that this method is not instant. You won't be able to get gift cards on day one but, after getting started, you can reach the point where you obtain one per day.

Ombra - September 6, 2020, 7:42 am

The guide will be delivered as soon as funds will be confirmed and forwarded to my own address. Make sure to send enough transaction fees if you wanna speed up the process.

rebate is like you get a part of your money back, there was a method for getting VCC when you purchase goodyear tires and you get up to 70\$ back on VCC
but that shit got patched and its now only physical cards.

Uhm no this isn't about rebates or VCC. If you're unable to use this method we can discuss about partial refunds but if all steps are followed you will get cards.

Ombra - September 15, 2020, 12:58 am

This guide allows you to obtain specific card values. In particular, you can get \$5,10,15,25,50,100 cards. \$5 cards are the easiest and most common to be obtained while it's very rare to get a \$100 card. Middle values have growing difficulty.

You will need about 2-3 weeks to receive the first gift card, then you can speed this up to 1 card per day.

I received a copy of the method by Ombra and I went ahead and read it all. There are two different methods actually, one just takes work and the other one can be quicker with a small investment from your side. With all the methods that are so bad and sold around this one has the big advantage that it works to the date, but you'll need to spend some time everyday to perform it (it's not autopilot at all). So if you have free time it's definitely a good method. Personally I don't like methods that require repetitive tasks so I'm not gonna use it but if you don't mind I recommend getting it and trying.

The method consists in a cycle that can be started/repeated as many times as you can handle each day. Each cycle will end with 1-2 gift cards.

Cycle length is 20 days, this means that if you start 1 cycle each day since you buy the guide, it will take you 20 days to receive the first cards, but then you will get new cards on a daily basis.

You can perform this method with your own computer and IP, but after 2-3 times you use it I'd recommend using a VPN/proxy. It doesn't matter if it's free or paid as what you need is just a different IP.

I'm only selling Amazon Dealer personally, the other one is in charge by my partner Duepi.

If you decide to buy my guide keep in mind the following

- It is greyhat (goes against ethics)
- It's not instant
- Requires you to perform SMS verifications
- Works better if you use it with some friends

cliffy1927 - October 30, 2020, 12:54 am

Yes sure, you can do this even if you're alone. Just make sure to use a VPN/Proxy (free ones are good too) after 2-3 times that you perform the method with your own IP.

Inside your contract you can find a checkout URL to purchase with BTC:

Amazon gift cards obtained with my method are completely legit and can be used without any risk to get banned.

Don't trust quick methods to get cards because those will likely lead to lose your amazon account.

Bitcoin fees are now acceptable once again. Let me recommend to purchase with Bitcoin and ETH right now that the network isn't overloaded.

Ombra - November 3, 2020, 9:55 am

This method isn't whitehat, you will have to go against ethics to perform it and this is enough to consider it as greyhat.

Just a few questions:

- You stated that it is not instant. In another post, you said the first GC would take approximately 20 days, then if the method is completed daily, you could get GC daily as well. Does that mean that you should do the method once, wait 20 days to receive the first GC, then do the method daily after that to get them quicker?

- Can you provide additional details with regards to the SMS verifications? Would I need to acquire a service for this to be able to have different numbers?

Thanks for your time.

The method takes 20 days because it's a cycle that takes that much to be completed. If you start 1 new cycle each day, on day 20 you will get cards from day 1 (the day you bought the guide) then on day 21 you will get cards from day 2 (when you started the second cycle) and so on...

Not much details are required about SMS verifications; they're simple verifications that can be performed with most mobile numbers.

Personally I use Chinese ones because they're cheap and can be purchased at \$0,05-0,15 per single SMS verification.

You need one-time numbers to perform this, so you will have to use a different mobile number each time.

Gift cards obtained with this method are US cards and can be used at Amazon.COM

If you're not from US you can always redeem them at Amazon.COM and purchase goods with international shipping

Ombra - November 5, 2020, 1:30 pm

This method can be repeated as many times as you wish and, eventually, it may be automated using bots specifically designed

Ombra - November 7, 2020, 2:35 am

This method requires SMS verifications to be performed. They're \$0.05-0.15 each. My personal provider is included in the guide if you don't know where to obtain them.

Keep in mind that this method won't provide you with gift cards instantly. You will need about 20 days to receive your first card.

Ombra - November 12, 2020, 1:28 pm

This guide works better if you're not alone when performing the method, teamwork can give you a boost.

Ombra - November 13, 2020, 3:16 pm

The guide is composed by two methods. One is the main one, which represents the core method to follow. The other one is a secondary method that can be applied to recycle your gift cards and make money.

Ombra - November 16, 2020, 12:19 pm

Please don't ask us for .PDF version of the guide as we do not provide it. All our guides and software are digitally provided using our website, where you will have to sign up.

Ombra - November 17, 2020, 12:38 pm

This guide is safe to use. Not only it is legally acceptable but cards are genuine, meaning you won't risk to lose your Amazon account.

Ombra - November 18, 2020, 12:58 pm

All cards obtained with this method are backed by USD, meaning they cannot be redeemed on local Amazon accounts that aren't US based.

Ombra - November 19, 2020, 1:25 pm

After purchasing make sure to contact me with your username or received serial key, this is the only way for me to check you finalized your purchase and mark your contract as completed.

Ombra - November 20, 2020, 1:30 pm

If you have time to spend each day, this method is perfect for you. I've been using it on a daily basis when I was in high school.

Ombra - November 21, 2020, 1:35 pm

This guide is NOT whitehat. It goes against ethics and can be classified as grayhat, keep that in mind before purchasing.

Ombra - November 22, 2020, 1:39 pm

If you'd like to purchase with a different crypto currency than BTC or ETH, feel free to contact me and I may setup a custom contract for you.

Ombra - November 23, 2020, 1:43 pm

Ombra - November 26, 2020, 11:33 pm

The process described inside this guide begins by creating a fresh e-mail address that will be used to register some accounts. It's something everybody can do without specific requirements.

Could you please advise another way of buying BTC and send it to you without so much ID verification like stupid coinbase?

Tried using google and it directs me to all kinds of websites where I have to send them f***ing everything about me.

I was wondering if you know another platform, easier and faster.

Thanks!

Keep in mind the process described in the method takes 20 days to complete.

Being said this, it pays out about \$35 worth of card each time and users start 1 instance each day.
This means that starting from the day you purchase the guide, you will need 23 days to reach \$100
and about 50 days to reach \$1000.

Ombra - December 13, 2020, 2:41 pm

Amazon Dealer allows you to manage as many instances as you can handle. I recommend this method to people that have free time to spend on it. I do not recommend this if you already have a job.

Ombra - December 15, 2020, 12:39 am

Amazon Dealer doesn't bring you any kind of risk. The method is not ethic but you won't have to face any consequence for performing it.

Ombra - December 16, 2020, 11:55 am

Amazon Dealer is scalable and you can run as many instances as you can handle. Furthermore, if you have some coding experience you can turn this method into semi-autopilot, saving a very consistent amount of time.

Ombra - December 17, 2020, 1:14 pm

All customers are eligible to receive updates for Amazon Dealer. No matter when you purchased the guide, as long as you can prove you bought it I will grant you access to latest version.

Ombra - December 18, 2020, 1:16 pm

Amazon Dealer works better if you perform the method with a friend of yours. This won't speed up the process itself, but will allow you to gain higher profits.

Ombra - December 20, 2020, 5:33 am

Gift cards obtained with Amazon Dealer are FREE of charge. To get \$5 to \$100 cards you will only have to perform some SMS verifications worth few cents each.

Ombra - January 4, 2021, 1:30 pm

This method requires you to perform some SMS verifications each time you're using it. These verifications can be purchased online at few cents (\$0.05 or so) each. This is the only "investment" that you have to face, if you wanna call it like that.

Ombra - January 6, 2021, 12:12 am

Feedbacks and suggestions are always appreciated as long as they come from legit customers. Contact me after purchasing with your order ID and I will mark your contract completed.

The method is divided into two parts: main part will teach you how to obtain gift cards for free. The second part will explain how to resell the cards for profit as you are free to resell them.

Ombra - January 10, 2021, 5:32 am

To use Amazon Dealer you don't need any pre-requisite or knowledge, everything will be provided inside the guide, during your journey to collect gift cards.

These amazon gift cards do not expire, you're free to redeem them when you want or sell them to other people with calm

Received it though convo. Thanks

Forgot to say, thank you for your purchase. Positive feedback left! ?

Ombra - February 3, 2021, 8:47 am

You can purchase this guide automatically by starting a new order on Shoppy (you will get a link after starting an official contract for Amazon Dealer).

Once funds will get enough confirmations, you will receive an email with your order details ?

Ombra - February 4, 2021, 8:55 am

To get your contracts marked as completed and receive a positive feedback you have to prove that purchase has been completed. This is achieved by contacting me privately and providing your Shoppy order ID or received serial key (to be redeemed on my website and get access to the product)

Ombra - February 5, 2021, 9:36 am

If you want a fast transaction I recommend purchasing with ETH at this time, considering the consistent transaction fee required to perform BTC payments at this time.

Ombra - February 6, 2021, 11:03 am

You can start using Amazon Dealer immediately after purchasing. No investment required to start but you will have to perform some SMS mobile verifications which are few cents each... I don't really regard it as an investment

Ombra - February 7, 2021, 11:32 am

I will not take PayPal again after they limited my account. I'm sorry but the only payment methods I accept and will accept in future are crypto currencies, if you don't know how to obtain them you're free to contact me to get some suggestions.

Ombra - February 8, 2021, 11:46 am

When purchasing remember to send enough funds so that transaction fees will be covered, else it

may take hours to receive your order details.

Ombra - February 9, 2021, 11:56 am

Several updates have been released over years, whenever a major change was needed. As long as this thread will stay open, method can be used

Ombra - February 10, 2021, 1:54 pm

Almost ready to release a minor update, Amazon Dealer v4.1 should come out in a day or two. It will be free to existing customers as usual

Ombra - February 11, 2021, 2:06 pm

Amazon Dealer v4.1 is out, as announced. Existing customers can find it between their purchased products as updates are FREE.

Ombra - February 12, 2021, 2:34 pm

You can purchase the guide directly from me, without having to use Shoppy (taking more time and fees). Just start a contract and contact me.

It is still a working and updated that can still be used. I also released a minor update few days ago after few months since last major update ?

Ombra - February 14, 2021, 3:03 pm

This method is not whitehat, be aware of that before purchasing. It goes against ethics and you may not feel comfortable when performing it.

Ombra - February 16, 2021, 12:32 am

You're free to provide me any feedback or report me issues concerning the guide. I'll inspect them and proceed with a fix if needed.

Ombra - February 17, 2021, 1:04 am

This method works better if you have one-two friends that will perform it with you, but it can be used even if you're alone.

Ombra - February 18, 2021, 4:39 am

I'm not offering more vouch copies. This thread has been started long time ago and they've already been given out when it was first posted.

This is a guide to obtain Amazon.COM gift cards free of charge, the only "investment" you need is few cents to perform SMS verifications online, each time you perform the method

Ombra - February 22, 2021, 7:26 am

With this method you won't have to talk to people by phone but you will have to send some private messages (just like the ones you send on HF).

Ombra - February 23, 2021, 7:27 am

Due to high fees on BTC/ETH blockchains I recommend purchasing with LTC/XRP/NEM/XMR manually by contacting me privately.

Selling 1x discounted copy at \$10 instead of \$20. That's 50% OFF.

Cards obtained with this method are not delivered instantly. It will take you at least 20 days to receive your first one, even if other ones can be collected on a daily basis.

Ombra - March 5, 2021, 5:55 am

If you want to buy Amazon Dealer quickly you're recommended to pay with LTC. There are very low fees right now, leading to almost immediate confirmation time.

Ombra - March 7, 2021, 12:18 am

Amazon Dealer v4.0 had an additional method included, along with main one. With v4.1 it has been removed because it couldn't be applied anymore. Main method remains updated and working.

This guide cannot be redistributed, you're free to talk about it with your close friends but you're not allowed to share the actual (web) document.

Ombra - March 10, 2021, 2:11 am

The method described in this guide can be performed if you're alone but it can be used with a small group of 1-3 people too, leading to lower effort.

Ombra - March 11, 2021, 5:24 am

Gift cards obtained using this method can be safely redeemed on your own Amazon account or sold to other people

Ombra - March 12, 2021, 6:21 am

Cards obtained with this method goes from \$5 to \$100. The first tier (\$5) is the most common to obtain while the last one (\$100) is the hardest. You will usually get \$5-10-20 gift cards, each time the method is performed.

Ombra - March 13, 2021, 7:21 am

I'm temporarily taking Litecoin (LTC) only as I'm re-organizing my payments setup and wallets. BTC, ETH and BCH will be available again starting from tomorrow.

I cannot take other payment methods than crypto currencies since my PayPal has been limited time ago. If you have issues getting some crypto you can contact me asking for instructions

Ombra - March 20, 2021, 4:16 am

Amazon Dealer does NOT require investments but each time you'll be performing the method (you can run as many instances as you can handle) you'll have to complete some SMS verifications. If you're gonna use online services for these, you'll have to pay few pennies.

Ombra - March 21, 2021, 5:08 am

Amazon Dealer v4.1 has been released on Feb 2021 and is still fully up to date. You can purchase without hesitation.

Ombra - March 22, 2021, 6:19 am

The SMS provider I recommend takes multiple payment methods but not PayPal, they will ask you to exchange your PayPal for crypto currencies or other methods. You can contact me if you need help about this

Ombra - March 23, 2021, 7:12 am

After performing the method few times you may need to use a VPN or Proxy to hide your IP. You can use paid or free services so you won't be forced to start any subscription.

Ombra - March 24, 2021, 8:52 am

This guide will teach you how to get free Amazon gift cards that are completely genuine. They and can be used to purchase goods but also sold to make some money, without risk of them being rejected.

Hey Ombra, I know I'm completely new to HF on this profile (used to have one here but I guess it disappeared years ago), but I recently purchased the method and it seems like a solid method.

I'm in the process of executing the initial stages of the method, but I also had an idea that may be able to expand upon the strategy for improved returns and results if you're interested. I can't send PMs yet but if you shoot me one I would be happy to share the idea with you. It may be something you've thought of previously, but I don't want to post about it here because it would be to revealing regarding the nature of the method and I don't want to disclose anything I shouldn't. Anyway I hope to hear from you, but if not, solid ebook all around and have a good one bro.

Amazon Dealer is a long lasting method that won't be patched anytime soon. You can use it to get free amazon gift cards for your personal needs or for money making purposes, selling them to other people.

Ombra - April 3, 2021, 8:40 am

This method can be applied by everybody without any need for specific knowledge or requirements. Everything is explained inside the guide, chapters come with detailed explanations and screenshots too.

Ombra - April 4, 2021, 10:00 am

Cards obtained with Amazon Dealer are worth from \$5 to \$100 each. Obtaining \$5 cards is a common thing while obtaining \$100 ones is rare.

Hello there, I am very interested in your method.

I am from a third world country, I & my best friend recently lost our jobs and looking for ways to pay our bills.

we need to earn a minimum of \$200/month each and for that, we are ready to work long hours like usual 9-5 job timings. Your method looks very promising for our needs.

before purchasing, Please answer some questions.

1. Estimated daily how many hours should we work to reach our goal of \$200/month ?
2. Estimated daily How much time it will take to complete a single task (instance)?
3. is it possible to start working on 40 instances from day 1 to day 20 (with no new instances until

the end of 20 day cycle for the first 40 instances) ?

4. How many instances can be completed on a single IP?

4. Should we need VPN & proxies to make this work ? If yes,

5. Nowadays many sites blocking access from VPN's and are't Good quality proxies cost's so much money?

6. Are there any trusted places to sell our gift cards for money without any hussle?

7. If we want to sell our gift cards quick, what pecentage of money we may get for a \$5 gift card ?

8. is it possible to sell a bunch of \$5 gift cards whole at once ?

Thank You

Since OP did not reply to my last PM, I'm posting here OP's answers to my questions and my next set of questions.

OP's answers:

- 1) There's no real estimation because you may get \$5 every time, leading you to spend more time into the method, sadly this is something that cannot be controlled
- 2) In general you can complete a single daily instance in 5 minutes. It may obviously take a little bit at the beginning, but after getting confident about the method, it takes obviously less
- 3) You can start with as many instances as you can handle, but personally I know nobody running 40 simultaneously.. most people stick to 4-5 for the whole 20 days
- 4) Ideally no more than 1 instance should be performed on a single IP
- 5) After using your home IP addresses, yeah you have to start using a VPN. No matter if it's a transparent L3 free one or paid one, you just need fresh stable IPs
- 6) Honestly I always used free VPN/Proxy and I never got blocked.. didn't check if things changed about this over last few months
- 7) Well you can check market rate for this.. I usually see cards being sold fast at 70% of their value
- 8) I don't see where the problem is, of course you can sell multiple \$5 cards at the same time, just tell the buyer about it (e.g. he will get e.g. 5x\$5 cards rather than 1x\$25)

My next set of questions:

1. 10 minutes/instance x 40 instances = 400 minutes = 6.5 hours/day
40 instances x 5 dollar/instance = 200 dollars/20 day cycle

What do you think about my above estimation?

2. If most people stick to 4-5 instances for the whole 20 days, are they using this method to earn just 20-40 dollars per month?
3. Are there any trusted places to sell our gift cards for money without any hassle? (excluding Paxful, hackforums currency exchange section, and unverified members of any site)
4. If I somehow consider starting 40 instances, Do I need to create 40 different accounts on the target website with 40 different email ids and 40 unique SMS verifications.?

Thank you

Thank you

I was convinced I answered your PM, probably there was a connection drop while sending. My apologies.

Considering multiple users copy-pasted your questions and forwarded them to me, I'm going to reply directly on thread this time.

- 1) Well \$5 is just one kind of card that can be obtained, with 40 ongoing instances it's unlikely to get exclusively \$5 cards but rather a mix of values. Also, it takes less than 10 minutes per instance once getting used to tasks that have to be performed each day.
- 2) See point above but let me clarify that this isn't a method to get rich, I never advertised it like that. Amazon Dealer is a method to get free amazon cards that can be used to purchase cool things or make some extra cash by reselling them. By "default" this cannot replace a full time job. I wouldn't recommend spending your whole day into this, running 40-50 or more instances, UNLESS you have time and resources to develop applications that will help you to automate and handle that many instances. Some customers over time did it and shown me their results but I obviously cannot vouch for them.
- 3) I cannot recommend any trusted place, that's because place doesn't matter as much as the specific user you'll be dealing with.
- 4) Yes, with 40 instances you'd need 40 unique emails but not 40 SMS verifications. SMS should be 80 because 2 ones are required per instance.

Be aware this method is not whitehat. If you have strong ethics, you should refrain from purchasing.

Ombra - April 13, 2021, 4:27 am

Amazon Dealer doesn't have any requirement and can be performed worldwide. I've sold this guide to many people all around the world and nobody told me that it didn't work in his Country.

Ombra - April 14, 2021, 8:17 am

Collecting gift cards with this method isn't instant, you'll have to wait 20 days since you start using the method for the first time to receive your first cards. Following this point you can also get them daily, depending on the instances you're running.

Ombra - April 15, 2021, 12:11 pm

You can run as many Amazon Dealer instances as you can handle, furthermore if you have some coding experience you may be able to automate most of the tasks required by the method, making it much more autopilot.

Ombra - April 16, 2021, 12:23 pm

Bitcoin Cash has been re-enabled as payment option. You can now purchase on Sellix via Bitcoin, Litecoin and Bitcoin Cash!

Please note that this method can be used from any Country in the world but you won't be able to obtain other cards than US ones.

Ombra - April 19, 2021, 1:24 pm

You're recommended to purchase with LTC at this time. Bitcoin fees are huge as there are over 150.000 unconfirmed transactions in the network.

Ombra - April 20, 2021, 1:29 pm

Amazon Dealer is completely risk free and can be classified as whitehat/grayhat. You can perform it with confidence.

Ombra - June 29, 2021, 5:52 am

Method described in this guide doesn't pay out instantly. It takes about 20 days for each "cycle" or "instance" to complete.

Nevertheless you can start as many instances as you wish / can handle so that cards will be delivered on a daily basis if you run a new one each day.

Ombra - June 30, 2021, 7:32 am

If you're willing to purchase with USDT or other crypto currencies feel free to contact me. I will process your purchase manually.

You don't necessarily need an Amazon Account to use Amazon Dealer. That's only required if you're going to redeem obtained cards for your own needs, but you can always sell cards to other people.

Ombra - July 2, 2021, 10:40 am

To complete each instance of Amazon Dealer you will need to perform SMS verifications. These can be obtained from the provider I recommend inside the guide or using your own (if you have one) or even your phone number (if you have enough numbers and are willing to use them)

Ombra - July 3, 2021, 12:10 pm

Ombra - July 12, 2021, 8:48 am

Hi, I am potentially interested in purchasing this method. Just before, how long does it take to get a card?

You say that each instance can generate between 1 and 2 cards. Is each instance a one-time use or does it continue to generate cards over time? And finally, we agree that it is not autopilot, right?

Sorry if these questions was asked before...

Hello, let me answer your questions in a minute:

- 1) Method takes 20 days to payout
- 2) Each instance is one-time. Once cards have been paid out, that instance has no use anymore.
- 3) This is not autopilot but can be automated if you have coding knowledge (by creating a bot or web script for example)

You're welcome anytime. PM me if you have any other question ?

When purchasing Amazon Dealer you're getting access to updates and support for life, as long as I'll be selling this guide. This is all included in the price you pay -one time- when making your purchase.

Ombra - February 12, 2022, 10:06 am

Amazon Dealer is a grayhat method. You'll have to play with other people even if you won't hurt them for real. If this goes against your ethics then you should refrain from purchasing.

Ombra - February 13, 2022, 10:36 am

This method can be used by you alone or by you and some friends (1-3) together as it can be performed by groups of users.

Ombra - February 14, 2022, 11:16 am

Guide is still up to date and working, if you find that this sales thread is closed then it means that I'm updating it but as long as it is open, be sure that product can be used.

Ombra - February 15, 2022, 1:21 pm

Note that method has been written with a friendly format and it comes with screenshots to let you understand all steps in a better way

Ombra - February 16, 2022, 2:56 pm

Amazon Dealer will teach you how to obtain free gift cards with little daily effort. You will have to perform simple tasks that will lead you to rewards (note: you won't have to do surveys or activities like that)

Ombra - February 18, 2022, 1:21 am

Few Amazon Dealer copies are left in my Sellix shop. I will restock them within today for new customers to be able to purchase them.

Ombra - February 19, 2022, 4:35 am

All you need to obtain free gift cards is inside this guide. You will find the method, my recommendations and advices about trusted providers for SMS verifications that I've found and used over time.

Ombra - February 20, 2022, 9:47 am

Note that I only deal via private messages and emails. I do not use Discord or Telegram

Wheezy Gang - February 20, 2022, 11:52 am

Hey Ombra, would you please elaborate more on this?

Can you explain more what should I expect to be doing to complete the process?

Does it involve talking with other people?

What kind of ethics goes against this method?

Otherwise , I am very interested.

Thanks

P.S.: you can private message me if you want.

Hey there, I have sent you a private message two days ago, thank you for your interest.

I'm only posting in-thread right now because I had some intense days and couldn't check my account, even if I kept replying to emails as usual.

Ombra - February 25, 2022, 12:02 pm

If you own a Binance account you can transfer funds to my own directly, just tell me which coin you want to use and I will provide you with proper address

Ombra - February 27, 2022, 5:24 am

All codes obtained with this method are completely genuine and can be safely stacked inside the same Amazon account without any risk of being banned for using them.

Ombra - March 1, 2022, 1:25 am

This is not the kind of method that you use to get just 1 card and then forget about it. The best way to use Amazon Dealer is by running multiple instances in parallel so that you will keep getting new cards over time

Ombra - March 3, 2022, 1:08 am

After purchasing you can ask for support using the proper contact area on my website, that's preferred compared to private messages as I have my support email synced on my smartphone.

Ombra - March 4, 2022, 6:20 am

These gift cards can be used to buy yourself goods at Amazon.com or you can just resell them to get a profit. They are completely safe to be used.

Ombra - March 8, 2022, 1:18 am

I'm now back from my weekend-trip. I have replied to all questions and support requests that were sent during the weekend. my apologies for taking more than 24h to get back to you.

Ombra - March 10, 2022, 11:40 am

Support is always included with your purchases. If you have any question or need help you're welcome to send me a private message (even if emails are preferred)

Ombra - March 11, 2022, 11:41 am

When purchasing any of my products you will be granted free lifetime updates and support. This means you will always get new versions free of charge whenever they're released to improve the main method.

Ombra - March 12, 2022, 11:55 am

Before purchasing please consider that this method is not completely whitehat but rather belongs to a gray area. You'll have to play with other people without hurting them to obtain the gift cards.

Ombra - March 13, 2022, 1:32 pm

Consider that after performing this method many times you will have to use either a VPN or a Proxy to change your original IP. You can use free or paid ones, that's not a problem, as long as you're able to change your IP.

Ombra - March 15, 2022, 2:28 am

Amazon Dealer is a time consuming method and I do not recommend it to full time workers. If you're a student it can be a good way to invest your free time instrad.

Ombra - March 16, 2022, 10:21 am

Multiple cryptocurrencies are accepted as payment method. You can check them all inside Sellix checkout page when ordering this product.

Ombra - March 18, 2022, 2:55 am

You can start and run as many Amazon Dealer instances as you wish, you can also use web scripts or desktop applications to partially automate this method.

Ombra - March 19, 2022, 4:16 am

This guide can be used worldwide as it does not have any Country restriction. The only thing to note is that gift cards obtained will be US ones.

Ombra - March 20, 2022, 7:57 am

Note that there are no pre-requisites to use this method and you don't need any specific knowledge. As of today everybody would be able to perform the method after reading it for the first time.

Ombra - March 21, 2022, 8:44 am

You can safely resell all the gift cards obtained with this method. This can be a way to get an extra income for the cards that you won't use personally.

Ombra - March 22, 2022, 1:29 pm

Note that this method works worldwide. As of today I've never been reported that it does not work in specific countries.

Ombra - March 23, 2022, 2:43 pm

Please remember that I cannot accept PayPal because my account has been limited, I only deal with cryptocurrencies

Ombra - March 25, 2022, 3:38 am

On average, every time that you will perform this method you will receive \$25 worth of Amazon gift cards. You're free to repeat it as many times as you wish.

Ombra - March 26, 2022, 7:16 am

If you have any issue while purchasing via Sellix kindly let me know, I'll either assist you or provide you with an address to process the transaction manually

Ombra - March 27, 2022, 3:00 pm

This guide does not allow to get you cards immediately, this is why I recommend it to people that have free time to spend on it. If you have a full time job and are looking for an additional income, this may not be the right product for you.

Ombra - March 29, 2022, 5:11 am

Every time that you perform this method you will be required to complete an online SMS verification. I wouldn't regard it as an investment because verifications can be purchased at few pennies each, if you don't want to use your own personal number.

Ombra - March 31, 2022, 7:42 am

ETH is an accepted payment method but those transactions have to be processed manually because of high network fees. If you want to buy with ethereum kindly send me a private message to get my address.

Ombra - April 1, 2022, 11:13 am

The guide is still active and working, you can be confident that as long as my sales threads are open, it means that product can be used.

Ombra - April 3, 2022, 4:36 am

If you have questions or would like to get additional information about the guide, feel free to send me a private message and I will try to assist you so that you'll be confident about what you're purchasing.

Ombra - April 4, 2022, 5:44 am

You can use this method with a small team of 2-3 people so if you want to involve some friends of yours, that is something that you can do.

Ombra - April 6, 2022, 6:27 am

Hello, note that you will need 20 days to receive your first payout since you start using the method, furthermore this only works for Amazon.COM gift cards.

Ombra - April 7, 2022, 7:09 am

Keep in mind that product delivery is completely automated as it is handled by an autobuy system. If you don't receive your order details within few hours since your transaction gets confirmed, kindly contact me.

Ombra - April 8, 2022, 9:58 am

The method is still working and will be as long as I keep this sales thread open. Obtained card value is unknown until you reach payout phase. In general every instance that you start will provide about \$25 worth of gift cards.

Ombra - April 9, 2022, 11:32 am

In one or two days I will stop using Sellix as my payment processing system, switching to another one. Checkout links will be updated for all my products. Note that you can always contact me purchase manually if you have issues.

Expherience - April 9, 2022, 4:24 pm

It took me a while but autobuy has been restored. Actually only LTC is supported but in a few days you'll be able to buy with BTC too.

Ombra - April 23, 2022, 11:42 am

Currently the autobuy system I'm using supports litecoin only, if you'd like to buy with other currencies you're free to contact me

Ombra - April 24, 2022, 3:53 pm

It will still take some days to add BTC as supported coin in my autobuy system but you can currently purchase with LTC and have your order confirmed/delivered in less than 5 minutes.

Ombra - April 26, 2022, 1:30 am

This method will teach you how to obtain Amazon Gift cards free of charge, there's no investment required to perform it but every time that you start you will have to complete an sms verification worth few cents each. You can use the SMS verification provider mentioned in the guide if you aren't familiar with these.

Ombra - April 27, 2022, 5:48 am

I'm working on a migration from my existing hosting provider to a new one. You won't notice the difference or experience any downtime as I'm working on a clone website.

Ombra - April 28, 2022, 6:56 am

My guides are digitally delivered immediately after your purchase, there is no waiting time as soon as your transaction is confirmed.

Ombra - April 29, 2022, 7:41 am

On average every instance of Amazon Dealer will provide you with \$25 worth of Amazon Gift cards. You are free to run as many instance as you wish, repeating the method every time that you need.

Ombra - April 30, 2022, 8:27 am

My BTCpay server used to handle checkout and autobuy has finished syncyng the BTC chain, this means that from now on you can buy automatically using Bitcoin too.

Ombra - May 1, 2022, 10:34 am

If you're trying to pay with Perfect Money using my autobuy page and you have any issue, kindly let me know about it.

Ombra - May 2, 2022, 1:16 pm

Receiving your order details takes as little as 1 confirmation for either BTC or LTC. If you'd like to pay with Perfect Money, you'll get your details as soon as funds are credited inside my account.

Ombra - May 4, 2022, 1:53 am

craftspace2345 - May 4, 2022, 4:10 pm

Ombra - May 5, 2022, 10:52 am

Note that this product receives updates every time that it helps to improve the method. Updates are delivered automatically and free of charge to all customers.

Ombra - May 6, 2022, 12:15 pm

Be aware that tomorrow I will perform my scheduled hosting migration to another provider. Site will be temporarily closed and for this reason you won't be able to access the products until migration will be finished.

I expect to conclude within tomorrow but in the worst case scenario, my website will be offline until Monday.

Ombra - May 7, 2022, 1:48 pm

Hosting migration has been completed and we're now back up and running. Thank you for your patience!

Hi, as stated in the PM I sent you, the phone number is required because you'll have to verify certain accounts on a given website before being able to use them.

You don't necessarily need a US phone number but just a phone number from any country, furthermore the guide includes a list of provider to get SMS verifications online at few cents each.

As stated in the PM I sent you, every instance of Amazon Dealer brings an average value of \$25 worth of cards (e.g. 1x\$25 card or 2x\$10+1x\$5) meaning that some instances may end up with only \$10 and others with \$50. The good point is that you can run as many instances as you are able to manage at the same time

This guide can be performed by whoever, as there are no specific requirements to follow the method.

Amazon Dealer is completely risk free although it is classified as gray hat guide, meaning that if you have a strong ethics you should not buy this product.

Ombra - May 25, 2022, 12:33 pm

All payments are processed using cryptocurrencies and my own checkout page, you will get your copy as soon as your transaction gets 1 confirmation.

As announced for my other products, Bitcoin is now back available between accepted currencies, feel free to buy right now!

Ombra - May 30, 2022, 12:40 am

This guide can be used regardless of your origin Country. The important thing that you should consider is that your payout will be in the form of US Amazon Gift Cards.

Ombra - May 31, 2022, 5:39 am

This method is classified as grayhat. It will show you how to obtain free official amazon gift cards without legal consequences but you might feel uncomfortable in performing it you have a strong ethics.

Ombra - June 1, 2022, 7:31 am

This method takes at least 20 days to receive your first payout but once you've reached that point you can get gift cards on a daily basis if you start a new instance every day.

Ombra - June 15, 2022, 1:40 pm

Hi, i'm curious about your product.

How much time do you have to spend to get one card ?

Is there any legal risk ?

If you do this method full time, how much can one expect to earn ?

Thanks a lot

Hello there

- 1) The process lasts 20 days but you can run as many instances as you want/can, meaning you can start more than 1 instance per day and eventually new instances every day.
- 2) There are no legal risks but this method is grayhat because it goes against ethics.
- 3) Depends on the number of instances that you run. For instance consider that every instance will bring an average of \$25 worth of gift cards so if you start 1 every day, on a monthly basis you will get $\$25 \times 30 = \750 with just 1 daily instance.

Ombra - June 23, 2022, 8:23 am

You can repeat this method as many times as you wish, there are no limits. Note that every time you'll start using it, you'll need a fresh email address.

Ombra - June 24, 2022, 9:09 am

This method can be automated using automated programs or web scripts. This would allow you to save time on the process and reach directly the withdrawal phase.

Ombra - June 25, 2022, 9:50 am

If you'd like to buy but you only have PayPal, remember that you can easily and quickly exchange your funds using the proper Currency Exchange section here, just take a look at the marketplace and you'll surely find somebody that can take your PayPal for Bitcoin (or Litecoin)

Amazon Dealer comes with free updates for all customers whenever there is a way to improve the method or a fix is required. All of them are provided free of charge, so you won't have to pay anything more in addition to the price paid to purchase the guide.

Ombra - June 30, 2022, 12:55 am

Redeeming these gift cards on your personal account will not lead it to be blocked or banned. All cards obtained with this method are legit ones.

cards to somebody else.

Hello there, after running many instances you'll need to use a VPN or proxy (free or paid doesn't matter). Remember that every instance requires an SMS verification too.

Secondly, you don't necessarily get \$25 gift cards. \$25 is the average value of gift cards that you will get with every instance, meaning you can get 2x\$10 gift cards with one instance or 1x\$50 with another and so on. Note that \$5 is the minimum gift card that you will get and that \$100 is the maximum one.

If all steps are followed correctly, gift card will be obtained. There's always the chance that something might go wrong on the path and in that case you'll just lose the specific instance you're using, but another one can be created to replace it.

As stated in the private message I sent you, beside SMS verifications you don't need any investment to apply my method.
Also, if you were sold a method that was like "buy a gift card and ask for a refund"... that's not a method, it's a scam.

Ombra - July 18, 2022, 9:23 am

This method can be scaled by running multiple instances of it. There's no limit on the number of instances that you can run at the same time and it might also be automated up to a certain point.

- 2) There's no limit on this, it depends on how many instances you're able to manage at the same time

Thanks in advance.

You are going to multiaccount and originally you might not use a vpn or proxy but after a while you will have to. No matter if it's a free or paid service, as long as you manage your instances with different IP addresses.

About your other questions, every instance requires an SMS verification and you can perform the method either by phone or using your computer.

Coming to payout, it takes 20 days for you to obtain your first payout

Just got a copy, will report back with review

Miggly - December 27, 2022, 11:38 am

Hi everyone, I bought a copy with my own funds. I was asked to leave a review so here we go :)

Accessibility: 9/10

Everyone should be able to access this method. There's no age restrictions, location requirements, etc. to deploy the method outlined in the eBook. You'll likely need a VPN at some point but it's not required to start. The book is easy to read, there are pictures, and Ombra covered everything. You don't need any kind of specialized skills to follow the method-- if you can signup for websites you're already 90% qualified.

There is one drawback for which I'll deduct 1 point for accessibility-- I do not know how to phrase this drawback without giving away a big hint (or confusing you) so I will omit it.

Scalability: 5/10

To do this solo sounds roughly twice as difficult. Ombra mentions it'd be useful to execute the method with others to cut back on the total amount of work for any individual. I think it would be really beneficial to have a private group for those who've purchased so they can search for partners or break off into their own groups. Maybe, maybe not.

To scale this method alone I think your profits will be 1:1 with the time you spend on it.

Creativity: 7/10

I've never seen this method before and I think it's clever. 7/10.

Overall: 7/10

I enjoyed the read and I do believe this method is worth the \$20. If you stick to it, it'd pay for itself in no time at all. I don't know if it's can't be saturated so I will not speak to that. I think I've said

everything else in the sections above, have a nice day!

When using my customer website, please pay attention to the number of IPs that you use while connecting. There's an automated system in place that limits the number of IPs linked to every user account. This is done to prevent account sharing, as sharing an account means sharing access to all products purchased by that account.

Hello, your point is correct and an instance of method requires about 20 days to reach payout. The good part is that it is possible to start multiple instances at the same time, the limit is the number of instances that you are able to manage.

About the actual work time, once you are used to the method, it will take few minutes per day per instance.

The issue has been fixed with a new certificate and I'm just answering all received emails during the past days.

NoiseDisplay - May 24, 2023, 2:35 pm

I've doing research on this guide cause I think I want to buy it, I found on another forum someone saying that this method involved sms and waiting a total of 20 days to get an Amazon gift card. I'm curious if this is just a referral trick that involves making multiple dummy accounts with sms to build up enough points to cash out an Amazon gift card and I'm also curious if this method involves actually using Amazon to get these gift cards as I imagine a method like this won't last that long because you're obviously taking advantage of a flaw in the system.

Hello, I am the one saying that this method requires SMS verifications (2 verifications per instance, worth some cents each) and about 20 days before reaching cashout.

About this method including referrals or similar, that's a NO.

You will have to create accounts on a specific website and those accounts will have to be used to perform some activities, but you won't have to invite/refer other people or similar.

Finally, you won't have to deal with Amazon at all. The method takes place outside of amazon website ?

Any discount or bonus going on ? Cant PM you.

Hello, let me answer your questions:

1. Rather than "minimum number" it is better to talk about "minimum value" for gift cards. On average, you'll receive \$25 worth of gift cards for every instance of the method you run, doesn't matter is you'll get them as 5 x \$5 gift cards or 1 x \$25 gift cards (remember, it's an average).
2. I've sold this method to people all around the world and so far nobody reported me that it didn't work inside a specific Country. Keep in mind that you can only obtain amazon.COM gift cards.
3. The only limit is the number of instances that you are able to manage at the same time
4. Negative, I'm sorry.

Hi, let me answer your questions right here.

1. Yes the method still works
2. Gift cards are genuine and can be applied to any Amazon.COM account. Be aware that using gift cards on fresh accounts with no purchase history is always a risk, not because of the cards themselves.
3. This method is time consuming, you won't get results on day one but after about 20 days since starting to use the method.

Every instance is \$25 on average, meaning that some instances might pay less or more. About limits, you can run as many instances as you are able to manage.

Coming to performing this method with other people, that is an option as it supports co-workers. Finally, about country restrictions, I have never been reported issues about specific countries but you have to keep in mind that this method will only provide US codes, no matter about the country where you use it.

My review of 'Amazon Dealer' ...

I purchased the ebook from the OP, as it seemed like an easy way to get Amazon Giftcards on the side... and figured it would be something one of friends could use for some extra cash. After reading the ebook, it's not something I would invest my time in, and the friend I bought the ebook for, wasn't interested in the method after reading it. Why? Because it's complicated work, for such little in return. And the process isn't some simple process, it's a long drawn out process that in the end, I don't think will be guaranteed a gift card everytime. Alot has changed since the OP originally wrote this ebook.. and while it may have been a convenient method for extra Amazon cards when he first wrote it, I don't believe it's as simple now. The place that you would be doing the flim-flam on to get the cards, has updated alot on their end since he first wrote the ebook.. And from what I gather, its not as easy and smooth of a process as it once was. Would I recommend this to friends/anyone? No, probably not.. as it's just too much, for so little in return... And as I said, I don't believe that it's guaranteed to work on every try. I could be wrong, but my friend felt the same way. Between me and my friend, we generated zero cards since purchasing the ebook. If that changes in the future, I will be sure to update this.

Ombra - April 9, 2024, 11:41 am

Thank you for coming back to post your feedback but let me point out that I always referred to this as a time consuming method. On the other side, I never mentioned that obtaining cards is guaranteed with every instance of them method. Some will pay out but some might not.

Ombra - April 10, 2024, 1:39 pm

Gift cards obtainable with this method range from a minimum amount of \$5 to \$100 per instance. The amount you will get is unknown until you will be closed to cashout but, on average, you will

receive \$25 worth of cards.

If the post above wasn't more than 48h old, I'd report it and get you warned from site staff.

First: This method is not about surveys. Don't claim it is equivalent to them.

Second: All buyers are aware of the product they're purchasing. I wrote explicitly that this is a time consuming method, just like I wrote explicitly that it is not recommended to full time workers but rather to students with free time. If you wanna have fun about this, do it in the Lounge, not in a sales thread.

Your account won't be at risk, as long as basic safety rules are applied (e.g. don't redeem massive amounts worth of gift cards on newly created accounts with no purchase history).

As long as this thread stays open, it means that the method is relevant and for sale.

A computer is not strictly needed but I'd recommend it, even if somebody could be performing this method using mobile phones.

SMS is the only "investment" for this BUT after performing the method few times you will need to alter your IP, hence a VPN/Proxy is required. You don't necessarily need to get a paid one, but that could be an option.

Because I cant PM you(Ombra) I shall paste my message here: Are your methods "GIFT CARDS GENERATOR" and "5 minutes profits V3" still available, if yes do they still work as you say and what would be the needed time for ROI? TIA

Your PM was sent, I will reply here and there.
5 Minutes Profits and Gift Cards Generator are not my products.
If you look for them on HF you will find they are sold by another member.
We use the same platform to advertise/sell our products, but each of us is responsible for his own.

I'm really interested in the long-term potential of this program. How much effort does it take to scale your income once you've got the basics down? Any advice would be appreciated!

The way to scale this up is simply performing more instances of the method itself, so it really depends on how many instances you are able to manage at the same time.

Hi, I am sorry but this does not appear to be related to the product I am selling in this thread,
therefore I don't know how to assist you.

Hi, I don't understand your question.

You don't have to buy gift cards using other gift cards balance.

How much do i need to invest after that ?

Hi, this method works and shows how to obtain amazon gift cards.

The question about using an aged account is not relevant because it is related to card redemption.

You don't really need an "investment" because you will only have to pay few cents for SMS verifications to perform this method.

Hi, all orders are automatically delivered to your chosen email address as soon as payments are confirmed on blockchain.

From my side I don't see pending orders, so I believe yours has been completed too.

Let me know if you have issues.
