Thread: [E-BOOK BAZAAR - ROUXSTER115](#)

rouxster115 - March 20, 2017, 5:32 am

Hello guys,

I have been away for awhile but I am back. While I have been away I have gained new ways for money making and have recently came into a FANTASTIC way of earning money but when something is this good it's probably black hat.

This is 100% BLACKHAT method and does not involve marketing, drop shipping, any physical activity, being a little e-whoring slag online or anything in that nasty business haha, except from typing on your keyboard. Due to Security and how black hat method this is, I will be selling the product at £200 (By the way, you will earn this back in the first day), this method cannot be saturated because you are 'targeting' different things daily. You do need an initial setup to buy the resources needed (online product) to start from £8-50.

I was going to sell this e-book at £250 but because of the initial resources needed I have lowered the price. I'm going to include another e-book in this what is physical method to earn money but also involves going online.

Once again, this is 100% black hat but you are protected if you follow the instructions. I will actually be guiding you through it one to one on Skype.

I have bought so many ridiculous E-Books on here and it's shocking how people can put such a good review on them after as in 'vouch copy', I will not be doing a vouch copy because this does work and it's pure money.

I am happy to be selling my own E-BOOK what actually earns (easily)!

Thanks for reading my thread guys, if you are interested, please message or post below. ??

Do you have any proof of earnings etc that you can post?

rouxster115 - March 21, 2017, 7:35 am

This is still a new method to me, what I'm going to do is post back once I show a lot of earnings because I've basically just been buying items. Will comment once I can show guys so stay hooked. ?

Does this method involve Amazon?

Prophett - March 21, 2017, 8:42 am

What are the legal consequences?

minimalist - *March 21, 2017, 8:44 am*

If it's "100% blackhat" then we probably don't allow it on here. What does this method involve?
