That looks amazing man, would love to see more of your work!

DoneitFast - March 24, 2017, 2:13 am

wow, this is awesome!

what software did you use for flash?

#Doge - March 24, 2017, 4:01 am

Thanks for the cnc.

Photoshop mostly.

Cinema 4D for miscs.

Neck could've used a bit of definition since it looks a little lost in his muscular figure. Animation is nice and clean I like how you focused on some of the details like the highlights around the eyes and the chest part glowing. Really nice over all but I'm not feeling the 'cavity' text on the bottom right of the animated version.
