Vouches

(Nov 27, 2016 09:34 AM)RealMafia Wrote: [\[CITE\]](#) Can I have a vouch copy ? Thanks

Edit: Received a vouch copy.

Ebook contains everything you need. From A to Z. Really helpful, the proxies tutorial is awesome too. Thanks for the vouch copy and HUGE VOUCH from me.

Worth the price. GLWS mate. (Nov 27, 2016 10:00 AM)x0176852 Wrote: [\[CITE\]](#) Well I received a vouch copy, this product contains a well explained guide about cracking, how to get proxies and make your own SQLi Injections to get combolists.

On every section of this product theres a guide and HQ Programs to use. Is very noob-friendly.

I VOUCH FOR THIS PRODUCT. GLWS (Nov 27, 2016 10:08 AM)VLuF Wrote: [\[CITE\]](#) Received a vouch copy of this method so I'm writing my review on it.

This cracking package contains lot of guides. and tools about cracking, getting proxies and checking them if they are working, dorks, sqli methods with tools like havij and sqlmap. Some of these are available in public tutorials, but it contains some unique tips which will surely come handy. Good luck with sales

(Nov 27, 2016 01:01 PM)GismoGuy Wrote: [\[CITE\]](#) Okay I messaged the seller and asked a review copy, he's provided me with Tier 2 so that's what my review will be based on.

Folder structure:

The product comes in a .zip file separated into 3 different folders, Cracking tips, Proxies and SQLi. Each folder has a mixture of files in them, ranging from basic .txt file and PDF's to python scripts. The proxies folder includes proxy scrapers and checkers as well as instructions for the. The SQLi folder contains guides for various SQLi tools as well has hash identification and cracking as well as methods for dorks to find SQLi'able websites. The Cracking Tips folder provides a PDF which details various helpful tips that any advanced cracker would know but for a total newbie or somebody just starting it will be very useful, the send part of the PDF details monetization of cracking which is very useful if that is your goal.

Layout and ease of use:

As mentioned above the .zip contains 3 folders, SQLI and Proxies both have sub-folders for various tools and utilities and all the reading documents have clear titles for what they contain. There is your jargon in the files that isn't explained but a Google search would easily explain them and you could get by without knowing the full meanings. The topics on hash identification and cracking are very useful and will be sure to answer many questions, especially since getting your own private combo's is better than taking public ones. Any requirements needed for the tools provided are also provided so you won't have to Google for other tools.

Usefulness:

On a scale of 1 to 10 I'm gonna rate this at around an 8, it's not the best you'll ever get but for \$12 max it will certainly do the job for you, you could go from having no clue to running your own shop without a couple of days of trial and error whilst following this, you'd certainly be on the path and from there you'd be able to experiment and find your own way. Cracking in itself isn't something you can just hope to start and be good at right away so don't expect to use this and provide no effort, everything requires effort to be good but this will certainly be useful instead of Googling for stuff that you don't fully understand or blindly following random tutorials across various cracking sites. Be prepared to maybe spend an extra \$10 to get you started with optional things like RDP's and some decent cracking configs and you'll be up and going in no time.

Lacking:

One thing I'd recommend to the seller is to include a part about various cracking software and basic usage, things like Multiforce or SentryMBA and maybe even include SentryMBA in the .zip file. Other than this, this package is a great start for you to get off the ground, just make sure to grab copy of SentryMBA and a few free configs before you buy just so you're ready to go. If this was priced at \$30 I'd say it wasn't worth the value but from anything less than \$15 you're golden, especially with the perks of their 2.

Cicatrix - March 24, 2017, 3:33 am

Looks like a great product, glws.

Also, edit the typo in the title of the thread.

Juicy - March 26, 2017, 4:45 pm

Willing to give a vouch copy for this!

@Kevin - March 26, 2017, 4:46 pm

Looks promising, good luck with sales!
