EARN \$5-10 DAILY WITH INSTAGRAM CPA + NO INVESTMENT

1. Introduction

Hello, in this CPA tutorial im going to show you how to earn at least 5-10\$ Daily. I am making this post dedicated to the noobies new to CPA. Well this ACTUALLY was the first thing to start off my cpa career. This is basically something YOU HAVE to commit to. if you can do this then once you payout you can invest in something bigger in CPA such as SEO CPA. Then you can be in the big league. First off i am posting here because i love helping other people. HF isn't like any other forum. They help each other here, mentor, and make friends. So im posting here to hopefully make some people happy :D so anyways lets get started. PM me if you need help i will give you my skype or gmail so you can communicate with me. Once you get the hang of this, its basically a no brainer.

2. Let's Get Started - Basics

First off you will need these things below.

1. Bluestacks (Faster)
2. 5 InstaGram Accounts
3. Good/Custom Template CPA Network
4. 5 Good Niches
5. Domain (Optional Because There are Free Websites)

Once you have these you would be ready to go. So first off after you have downloaded bluestacks download instagram from the google play store. In case you don't know what bluestacks is its basically a phone emulator (specifically android) for computers. Bluestacks is used for many different reasons. It could be used for gaming, profit, pleasure, etc. There are other Android Emulators, but this one is my #1 recommendation for many reasons. Its the fastest and doesn't take long to get the hang off. Plus optimized for all computers including windows and mac. If you don't have this then i recommend it.

3. Selecting Your Niche

Selecting a niche is pretty simple. all you have to do is use your IMAGINATION. Be in the opposite persons mind trying to find some "free gift cards" or "free paypal hack". Think of what you would believe to be real to be worthy of filling out a survey. You have to be the other person. That's why not only selecting another niche is important, but making your instagram profile and your website look professional the more professional, the more attention and belief your niche gets. To me, the niche part isn't a problem. I like to think outside the box. You have to think outside the box to become the real person making money here.

4. InstaGram Profile

So for each of your accounts basically go to google images or something and get a related image of your niche. So if its a pokecoins hack just put up an image of pokemon go or something. Depends on your niche. In your description put the instructions on how to get the coins or free gift card and

then put your website in the bio. Then once you do that and setup then your on your way bud :).

5. Traffic

You would think This is hard, put its fairly really simple. Just search up other usernames or hashtags of a similar niche and follow the users following them. At first as a noobie i didn't understand this but now i fully understand it. Make a goal. Try to follow at least 500 users per day on each account. There are services that can do this for you such as followliker or massplanner if your more of an autopilot person. Following 2,500+ Daily isn't as hard as you think though. Its quite simple. For instance, you can spend an hour following people and you would be halfway done or possibly done if your a fast worker. Its really simple.

CONCLUSION

If you have your website, IG Profile (Old IG Accounts Also Help), Work Ethic, and Traffic, your guranteed to make some \$\$\$\$. The key to CPA success is to don't allow any distractions. Just work. You can do the distractions once your a master of CPA. Then your making hundreds on autopilot. I hope this tutorial helped!

Good method but accounts get banned very quickly

Cheese Doober - March 22, 2017, 8:45 pm

it feels like instagram has been cracking down or something because it seems like everyone gets banned very quickly but nonetheless very nice guide :)

xClain - March 22, 2017, 9:23 pm

Yea, once i get enough money to cashout on my cpa network i am going to invest into YouTube & Google SEO. Those are where the money makers are. This guide is for the noobies/beginners to build their money up before they get banned or if they want to continue with proxies on IG. Once they have the money they can invest also.

Nice tutorial, I haven't had any luck with instagram. I invested in instagress and massplanner and a few aged accounts but they get taken down pretty quick. Still trying though.

I've had more luck with youtube and BH gotten about \$20 in under 2 weeks. No ROI yet. Probably invested about \$50 or more. My impressions are up but clicks are going down. Some days I get 1 lead of \$0.04 and some days i've gotten \$7 in leads

IG became strict nowadays so it's not that profitable anymore imo but that doesn't mean you can't make money there anymore.

#Realtalk. - March 23, 2017, 8:05 am

IG will be less strict now that all you guys leave it alone :-)

That's a very interesting method for sure, but as these gentlemen says, I've made it and get 4 over 5 accounts banned in 2 days unfortunately. But there is something to made out of this, definitely ;)
